

# Resent Slurs On the Harbor

Board of Trade Notices State-  
ments That There Is Lack  
of Accommodation.

## Likelihood of Marconi Wireless Station Being Erected on West Coast.

The council of the Victoria Board of Trade is greatly displeased over the circumstance that the Board of Trade has been made from time to time respecting the adequacy of the harbor accommodation of the port of Victoria. Certain advocates of more extensive harbor improvements have from time to time publicly stated that Victoria had suffered a direct loss of shipping owing to lack of harbor accommodation, and the matter was brought to the attention of the council at a special meeting held yesterday morning. One of the matters dealt with is of more than passing interest—the Marconi Wireless Telegraph Company of Canada has been in communication with the board, seeking information preparatory to the establishment of a wireless station on the coast of Vancouver Island. All the information has been forwarded to the company and developments are awaited with interest.

President L. G. McQuade presided, and there were present also C. F. Todd, D. R. Ker, R. Seabrook, T. W. Patterson, S. J. Pitts and A. J. W. Vincent, the latter as a representative of the committee on harbors and navigation.

**HARBOR IMPROVEMENT.**  
This committee submitted a report, accompanied by a chart, showing the improvements which it is desired to have made in the harbor, and the requirements of the port. The report recommended, and the council approved of the idea that the channel in the harbor be dredged from the in-land depth of 16 feet at Jervis Street, to a depth of 16 feet at Point Ellice. It suggested that the channel be dredged to 12 feet.

The council of the Board of Trade had the matter before them. Senator McQuade presided, and the committee on harbors and navigation, which had been appointed by the board, presented a report. It was suggested that a chart be prepared showing just what were the pressing requirements in the way of harbor improvement. He asked that the same be forwarded to him at Ottawa. All being now in readiness, the committee was adjourned.

**HARBOR COMMISSIONERS.**  
President McQuade reported the receipt of a communication from the Board of Trade, asking the board to appoint a committee to confer with the Board of Trade, and to consider the question of the harbor improvement. The board of harbor commissioners, which was appointed by the board, presented a report. It was suggested that a chart be prepared showing just what were the pressing requirements in the way of harbor improvement. He asked that the same be forwarded to him at Ottawa. All being now in readiness, the committee was adjourned.

A member of the council expressed a wish to ascertain if it was proposed to remunerate the commissioners for their services. If such was the intention, and the salaries were to be paid, the board would be glad to accept of the same. The board of harbor commissioners, which was appointed by the board, presented a report. It was suggested that a chart be prepared showing just what were the pressing requirements in the way of harbor improvement. He asked that the same be forwarded to him at Ottawa. All being now in readiness, the committee was adjourned.

A discussion then ensued on the question of the circulation in the press of statements emanating from the board of harbor commissioners, regarding the board's available harbor accommodation. On numerous occasions it has been publicly stated that the board of harbor commissioners, which was appointed by the board, presented a report. It was suggested that a chart be prepared showing just what were the pressing requirements in the way of harbor improvement. He asked that the same be forwarded to him at Ottawa. All being now in readiness, the committee was adjourned.

**A WIRELESS STATION.**  
President McQuade also reported the receipt of a communication from the Board of Trade, asking the board to appoint a committee to confer with the Board of Trade, and to consider the question of the harbor improvement. The board of harbor commissioners, which was appointed by the board, presented a report. It was suggested that a chart be prepared showing just what were the pressing requirements in the way of harbor improvement. He asked that the same be forwarded to him at Ottawa. All being now in readiness, the committee was adjourned.

The wireless telegraph company had been informed accordingly and also reminded of the importance of the proximity of the station to the harbor, and the rapid increasing shipping interests on the coast.

**IMPROPER BOOK-KEEPING.**  
The secretary of the Montreal Chamber of Commerce forwarded a communication directing attention to the failure of many business men to properly keep their books, as instanced in so many cases being brought to the attention of the board. This was a very serious matter in the eyes of the board, and the cooperation of the board was asked in an endeavor to secure legislation aiming at making it compulsory for every business man to keep his books.

It is suggested that those failing to comply with the proposed law should be held criminally responsible unless they can establish that they had no intention of defrauding their creditors. The council decided to recommend the endorsement of the proposed law.

Replying to overtures from the Board of Trade, that the latter would welcome the cooperation of any business men in the task of upbuilding the business interests of the city, the Chamber of Commerce informed the board that it would be willing at all times to cooperate with the board in the matter referred to.

The London (Eng.) Chamber of Commerce forwarded noncommittal forms to be filled in with the names of persons who desired to represent it at the forthcoming session of the Cham-

bers of Commerce of the Empire, which will be convened in August next. The letter was referred to the full board.

# THE CRIME OF HIGH TREASON

Wonderfully Eloquent Words at  
the Sentencing of Lynch  
the Traitor.

When Mr. Justice Wills pronounced sentence on Arthur Lynch, the traitor, on January 23, his impressive words, patois and the crime of treason are worthy of preserving.

First the crime made his quaint proclamation for silence in court while sentence of death was being pronounced. Simultaneously each judge put on his black cap. As they sat there their foreheads shrouded by these terrible little squares of cloth, they looked as though they had come straight out of the fifteenth century, when the King's justice had to quell turbulent traitors in real earnest, for their countenance, the silence deepened, and prisoner and court waited in expectancy for Lord Alderton to speak.

There was a general movement of surprise when, instead of the Lord Chief Justice, Mr. Justice Wills, rose to pronounce sentence. A curious smile crossed his features when the judge began. But the smile deepened into the gravest that any man's face has ever worn. Sir Alfred Wills proceeded.

His words were beautiful and they were very beautiful. In acceptance of the sentence, he said, "I accept at once so low and so silvery in their clearness that they carried to the furthest end of the country. The venerable face of the judge assumed no look of forced sternness. Rather his look was grave and very great. Russia was spoken in trembling tones of the duty that a man should owe to this England, so, so low to punish, so long suffering.

It was a voice that spoke not to one poor soul alone, but to the whole of the voice of England. Thus he began: "Arthur Lynch, otherwise Arthur Lynch, the jury have found you guilty of the crime of high treason."

Notwithstanding the most gratifying increase in the value of the production of non-metallic minerals, the grand total value of the production of non-metallic minerals of Canada, shows a falling off of 2.61 per cent. This is due to the decrease in the value of the output of gold of \$3,500,000, but also to the decrease in the value of the output of silver of \$1,500,000.

Lord Bessborough's Successor in Parliament Has Large Majority.

London, March 11.—The election of a successor to Lord Chas. Bessborough, Viscount of Londonderry, took place today and resulted in a majority of 3,229 votes for the Labor candidate, Mr. Crook.

**POURING INTO  
THE NORTHWEST**  
Train in Three Sections With  
Hundreds of New Settlers  
Aboard.

Winnipeg, Man., March 12.—The train from the East was in three sections today to accommodate the large number of Ontario homeseekers who have started westward bound. The train had on board 300 passengers from Western Ontario and 300 passengers from the Northwest.

**FEEL FROM A STEAMER.**  
Thomas J. Sehl Injured as a Result of  
Accident at Esquimaux Yesterday.

Thomas J. Sehl was the victim of a painful accident yesterday afternoon, when he was struck by a falling beam at Esquimaux. He was at work on the hull of the steamer Princess May, which was hauling a net for the fishery.

**INDIA AND THE MUTINY.**  
Lecture to Be Given Illustrated by  
Photographs Taken During Struggle.

An illustrated lecture will be given on Monday evening next, March 16, at the Institute Hall, on View Street, by Mr. J. J. Tetter, under the auspices of the Order of the King's Daughters. The subject will be India and Delhi, at the time of the Mutiny.
