LIKELY TO AGREE ON DISSOLUTION

Plan of Solving Problem Which Asquith Government is Expected to Adopt at This Week's Cabinet Meeting

ELECTIONS POSSIBLE BEFORE HOLIDAYS

Unionist Press and Politicians Give Prominence to Securing of American Money for Irish Nationalist Funds

LONDON, Nov. 12.—A cabinet meeting on Monday or Tuesday will decide upon the step the government will take to bring the political crisis to a focus. The plan most likely to be agreed upon is the immediate dissolution of parliament.

While the government might send a bill embodying its veto proposals to the House of Lords for consideration, the lords would certainly reject it, but probably would consent much time in its consideration and discuss the general question of reform of the Upper House along the lines suggested by Lord Rosebery last session.

Immediate dissolution will save time and perhaps make possible the holding of the elections before the holidays. "Home Rule and Home Ruling," "Men with American Money," "England for Sale," "Bid Two Hundred Thousand Dollars." These headings appear today in the Sunday Observer.

It is the campaign of the Conservative press in reply to agitation in favor of Home Rule.

The paper publishes three columns denouncing the "Unparalleled Ignominy of the attempt to tamper with the constitution with a simple bill."

Frederick Edwin Smith, M. P., for a speaker at Liverpool, a leading Conservative, ridiculed Mr. Asquith as the successor of Chamberlain, declaring that he was powerless unless the appearance of the incorporation and discussion of the bill, with his pockets bulging with American gold.

CABLE RATE REDUCTION

Official of Commercial Cable Company Comments on Collected Clergy's Statements.

NEW YORK, Nov. 12.—George Clary, vice-president of the Commercial Cable Co., being asked in regard to the interview with Col. Clowry, president of the Western Union Telegraph Company, relative to the amendment of the Commercial Cable Company's reduced cable rates on plain letter messages, said: "Our five letter cable reduction plan is entirely new and was drawn from the old plan mentioned by Col. Clowry, and his insinuation as to the Commercial Cable Company's attitude is incorrect. The whole history of the Commercial Cable Company is to the contrary. We are the ones who reduced cable rates from fifty cents to twenty-five cents a word, and after two years and a half of fight, the Western Union was obliged to do the same. Col. Clowry omitted to state that the chief object of the trip to London of Mr. Hall of the Western Union Telegraph Company and also vice-president of the American Telegraph and Telephone Company, is not the question of the amendment of the English companies with the Western Union in opposition to the Commercial Cable Company, and he might have added that Mr. Vall, the president of the American Telegraph and Telephone Company, made a trip to London last summer for the same purpose."

CANNERS ANXIOUS TO KNOW DECISION

Matter of Boat Rating Still Hanging Fire at Ottawa—Report Commission Sent in Long Ago

VANCOUVER, Nov. 12.—Until the temporary rules for salmon boat rating were inaugurated at the beginning of the late season by the Hon. W. J. Bowser, the salmon catch had been retarded by a great deal of unnecessary expense caused by the strong competition for boats among the cannery owners.

The ratings of boats registered by the chief commissioner of fisheries, was according to the size of the canneries, and though at first there was some objection to them they have eventually worked out so satisfactorily that the cannery owners are anxious to see them adopted, if not in toto, at least almost in toto, as a permanent rating. At the suggestion of Hon. W. J. Bowser, a commission was appointed by the Dominion government to handle the entire matter, and to determine the best arrangement which could be made permanent.

The report of this commission, which consisted of J. E. Babcock, former deputy commissioner of provincial fisheries, and of J. T. Williams, Dominion inspector of fisheries for Northern British Columbia, was submitted to Ottawa some months past, and it is to be expected upon within a very short time. The report has not been made public, but it is understood that the rules will follow closely those laid down by Hon. W. J. Bowser. The investigation made by the special commission appointed by Hon. Mr. Bowser has included a careful survey of conditions at Rivers, Inlet, Skeena and the Nass Rivers.

As a large number of the canners are now ordering new equipment for the coming season, they are anxious to receive news of developments in Ottawa.

Speculations on Reciprocity

Washington's Guesses as to What Has Resulted From Last Week's Negotiations at Dominion Capital

CANADA'S PROPOSAL NATURAL PRODUCTS

List of Articles Included in Dominion's Offer Believed to be Disappointingly Small for Americans

WASHINGTON, Nov. 12.—A general reciprocity agreement between the United States and Canada, covering all the tariff schedules, as an immediate result of the conference which took place last week between special commissioners representing the two countries, is not expected by the officials here. It was not supposed when the negotiations were begun that complete reciprocity on all natural products of the two countries, native and manufactured, would be reached at the outset. The interests of the two countries were regarded as too extensive to admit of the violent development that might follow wholesale application of reciprocity principles.

The only practicable method was believed to be through an approach by means of a list of articles.

The state department officials are not yet acquainted with the details of the conference at Ottawa. It is understood such state consent is required with submitting a list of articles upon which reciprocity might be applied through a substantial reduction of import duties, as in some cases, through the elimination of these taxes.

As first it is the Canadian proposal of natural products such as sheep, wool, hides, skins, agricultural products, and other articles of agricultural production.

Whether it was proposed to set good pulp on the American free list could not be learned.
