Ozune is the processional or technical name given to an advanced form of catarrh in whilch ulceration has eaten through the membrane liming of the nose to the cartilage of the bone. Any case of catarrh may end in ozoena, but it most frequently occurs in those who are naturally secondons. The discharge takes place through the nostrils or through the spilled wolse, frequently tinged with blood, and almost always attended by an offensive smell. In the language of Dr. Wood of Philadelphia "the disease is one of the most obdurate and disagreeable which the physician has to encounter. In bad cases the breath of the patient becomes so revolting as to isolate him from society, and to render him an object of disgust even to himself."

In some instances pieces of bone become separated and slough off, leaving deep; unhality ulcere, which strete a blood matter, and are extremely difficult to heal.

After ozona has continued some time the sense of smell usually becomes impaired and often lost.

Deafness is one of its most common consequences, and results from its extension through the eustachian tubes to the internal ear.

Pains in the head and over the frontal sinuses, impaired memory; and even insanity, frequently spring from its extension to the brain.

The greatest danger, however, because the most common, is that it will extend downward and effect the lungs. In most cases of pulmonary disease

common, is that it will extend downward and effect the lungs. In most cases of pulmonary disease catarrh is present in some degree, and in many instances it causes a large share of the patient's discomfort. Besides these grave consequences, all of which are liable to spring from scrotulous catarrh or ozena, there are others which if less dangerous, are sufficiently unpleasant. It occasions great unhappiness to thousands of; young people of both sexes, by isolating them and preventing their settlement in life. An offensive running from the noise, with foul breath, is about as great a calamity as can befall young people.

## **BOLT AND IRON COMPANY**

OF TORONTO, LIMITED, AT PAR.

This is one of Toronto's most important manufactories, giving employment to a large number of men and attracting to the City a large trade that formerly went elsewhere.

Capital (Authorized) Issued • Subscribed 

The New Works are fireproof and cover an acre of ground. The men and machin rein are all in sight of the manager. A Railway siding runs along the front of the works to facilitate the receiving, adding and shipping of goods.

The estimated saving in labor alone will be over \$5000 a year. The works being fireproof may afford a saving in insurance of \$4000 a year. Rent, water rates, city taxes, gas, etc., a saving of \$3600 a year. Fuel, that has heretofore been delivered ex-yard, will be delivered ex-cars, at a

living of nearly \$2500 a year.

The Building being specially constructed for the business, every evil attaching to other premises in which leakage, waste and tinkering expenses were unavoidable, will effect a very large saving that cannot be fully estimated in figures. Every convenience exists for doing more and better work, as well as greater variety, than heretofore, at a less cost of production and with more satisfaction to all concerned.

The Company have on hand extensive orders from the following Railways:

The Canadian Pacific Ry.
The Great Western Ry.
The Michigan Central Ry.
The Kingston & Pembroke Ry.
And Other Companies.

The Grand Trunk Ry.
The Canada Southern Ry.
The Ontario and Quebec Ry.
The Manitoba & Northwestern Ry.

The permanent, fixed and steadily increasing portion of the business is with Hardware Merchants and other manufacturers all over the Dominion in Carriage, Stove, Tire, Fancy

The capacity of the works now aggregates 30,000,000 bolts a year, one car load of railway Bolts and Spikes per day. This extent of trade slackens some portions of the year, but with the opening of the Northwest it will largely increase, and the track renewals with repairs will alone constitute a large trade.

The Works are a necessity in the country, almost as much so now as the Telegraph or Telephone Companies, the Railways being in absolute need of the Works, without which Railways would not be built as fast as they are now being rushed through the

Provinces of the Dominion on the name alone without call for samples, which are now rarely ever asked for.

The Company own over 200 acres of land, bought at a low price, within the proposed city limits, portions of which have already been sold at Four Hundred per cent profit, and sites as well are allotted for three other factories about to be erected.

This is the only available property fronting the Humber Bay or west of the too much crowded Esplanade, that is available for use by railways. It combines advantages not possessed by any other property in or near Toronto in having lake and river frontages for wharfs and docks with safe open harbor all the year round ptotected by Mimico and Parkdale points. The property is also well situated as a pleasure resort, having parks on three sides with the lake in front.

The annual meeting was held on the 13th instant for the first six months' business of the Company, at which a Dividend was declared at the rate of ten per cent per annum for the half year ending on the 1st of May last.
