SIXTEENTH YEAR

TO ASK HOLMES' EXTRADITION

Verdict of Wilful Murder Re-  
turned Against Him.

HIS SUBMITTED TO BE REQUESTED

Discovery of a Skeleton in  
Holmes' Chicago House.

The Body Believed to Be That of Mrs.  
Conner's Child—Holmes Admits It Was  
Buried in a Medical College—

Tenant of the Hotel Cottage, St. Vi-  
cent-street, Found the Body in the Cellar of a  
Light, Colored Woman and a Pearl  
Hair String Which Belonged to the  
Murdered Children—The Jury Took  
Ten Minutes to Decide Upon the  
Guilt of the Dead.

That Alice Pitezel came to her death  
on or about the 25th day of October,  
1894, at the city of Chicago, and that  
H. H. Holmes, alias Mudgett, alias  
H. H. Holmes, alias Howard, did on or about  
the day last aforesaid at the said city  
of Chicago, unlawfully, wilfully and  
of malice aforethought, kill and murder  
the said Alice Pitezel.

After ten minutes' deliberation, the  
jury empaneled to enquire into the  
death of Alice Pitezel reached this ver-  
dict last evening.

A warrant for Holmes,  
in accordance with the finding, Cor-  
oner Johnson at once issued a warrant  
for Holmes, charging him with murder.  
Crown Attorney Dewar will lay the  
verdict and the coroner's warrant be-  
fore the Attorney-General's depart-  
ment this morning, and extradition pro-  
ceedings will be entered into at once.  
Every effort will be made to have  
Holmes tried in this city. The evidence  
is much stronger here than of  
murder in any other city where he is wanted,  
and the chances of his swinging in  
York County jail yard are good. The  
Chicago authorities are very anxious  
to try him there, but it is thought  
Toronto's claim on him will have pre-  
cedence with the authorities of Phila-  
delphia.

The jury empaneled by Coroner Cor-  
nell to hold an inquest on the body of Nellie  
will be called together at once. The  
evidence and verdict of this inquest  
will be put in by Coroner Johnson.

One hour only was taken up with  
the airing of the evidence. Albert Love,  
who was bookkeeper at the Albion  
Hotel at the time of the murder, was  
shown the photos of Alice and Nellie  
Pitezel and of Holmes. The former, he  
said, were registered in October last  
at the Albion Hotel under the names  
of Alice and Nellie Canning. His re-  
collection of Holmes was faint, but he  
thought he had seen him there during  
the stay of the girls. The fact that the  
children seemed to be alone drew his  
attention to them. Their bills were  
settled each day by a gentleman who  
called, and who, the witness thought,  
was Holmes. The latter, who was twice  
seen before the bodies were discovered.  
A small piece of material, apparently a  
portion of what had been a light-colored  
waist and a scarlet hair string, pro-  
duced by the coroner, which he re-  
called as having been pulled from the  
end of a plait of hair. Mr. Armbrust  
said he had found them a day or two  
ago clinging to a piece of board which  
had been taken from the cellar. The  
find is a fortunate one, as it furnishes  
another proof of positive identification  
of the bodies as those of Eliza  
Alice and Nellie Pitezel.

Mr. Armbrust also told of the dis-  
covery in different parts of the house  
of fragments of clothing, interwoven  
with straw, and partially burned, sup-  
posed to be remnants of the clothing  
of the murdered girls which Holmes  
had endeavored to dispose of by burn-  
ing. One pair of girls' button boots,  
and one odd boot, were found in the  
wood-loft.

Other witnesses had been summoned,  
but they did not answer when their  
names were called. Mr. Dewar thought  
positive evidence had been submitted,  
and said he would not wait for the  
who were absent.

The Coroner's Summing Up.

In opening his address, Coroner John-  
son said the exact time of Alice's death  
could not be ascertained. She was seen  
alive on the morning of October 25, and  
nothing more was heard of her until  
her body was found. Where she met  
her death was at once apparent.

The coroner then reviewed the evi-  
dence as given, tracing Holmes and the  
girls through their movements during  
the interval between October 19  
and 25, laying especial emphasis on the  
evidence of Holmes' conduct in the  
cellar of the hotel cottage on October  
24, and the complete disappearance of  
the girls on the following day. The  
identification was most complete, both  
of the girls during his stay here and of  
the girls before and after death. The  
jury were reminded of the positive  
identification of the bodies by Mrs.  
Pitezel as those of her children. "Had  
she not identified them," said the cor-  
oner, "it would have been necessary  
for me to show you the teeth of Alice  
Mrs. Pitezel, and to examine the teeth of  
her mother and of the daughter. It was  
the same, showing the same marks of  
peculiar construction."

The motive for the crime was spoken  
of as being strong to a man of Holmes'  
disposition. Alice was the only person

who could give evidence to convict  
Holmes on the day in the basement.

Thought to Be the Body of Gertrude  
Conner.

The bones found this morning are  
believed by the Central Station de-  
tectives to be those of Gertrude Conner,  
the daughter of Mrs. Julia L. Conner,  
who is now believed to have been one  
of Holmes' victims. Mother and daughter  
disappeared about the same time.  
This afternoon the workmen came  
upon another deposit of lime under the  
rotten stairway which was used as a  
secret means of ingress to the cellar.

Only one bone was found here, and  
it was pronounced by a physician who  
examined it to be a part of a middle  
portion of the foot.

A member of a firm which manu-  
factures large oil-burning furnaces was  
found yesterday. This firm was engaged  
by Holmes, the insurance swindler  
and murderer, to adjust an oil burner  
to a furnace which he had built in the  
cellar that is now under investigation  
at Sixty-third-street.

Holmes exhibited the furnace with  
reluctance. A burner was finally fitted  
several sections of the vertebrae, and  
it was described as a piece of an upper  
jaw with two teeth attached, were  
found. Eleven more ribs were taken  
out of the place, and with the ribs that  
out of the place, and with the ribs that  
out of the place, and with the ribs that

On the jacket was a small bunch of  
hair, too much discolored by the dirt  
to give a notion of its original color.  
Seven ribs were thus taken out, when  
the bones lay on a board 20 inches  
wide and 30 inc long, and this in turn  
rested upon a dirt-hard floor. The hard  
dirt underneath would indicate that  
it was the original floor of the cellar,  
and that it had been filled with about  
two feet of earth at a later period.  
In this filled portion lay the bones.

Three sections of the vertebrae and  
one of the ribs were taken to the office  
of Dr. Charles F. Worth, who examined  
them carefully and gave as his opinion  
that they were from a human body.

"I am not able to apply any tests,  
but from a supravital examination I  
would unhesitatingly pronounce the  
bones as being from a human body,"  
said Dr. Worth. "They are discolored  
with age, or the attack of some chemi-  
cal substance, and the damp earth in  
which they have been lying has added  
to their discoloration. I believe a  
careful examination will disclose their  
human origin."

Mrs. Conner's Child.

Two pieces of fat bones were found  
in the hole, probably, the police think,  
being shoulder blades. That sections  
of the smaller bones of the body should  
have been found without any trace of  
the larger bones of the arms and legs  
makes the find more mysterious. A  
glass vial, containing about four ounces  
of a white substance, was found in the  
hole, and its character has not yet been  
determined.

After reaching the building, the  
Chief of Police and Inspector Fitzpat-  
rick and the detectives retired to the  
rear of C. E. Davis' drug store in the  
building, with the newly-found frag-  
ments. Joseph Owens, who was janitor-  
and who is said to have been a part  
of the skeleton of either of the Williams  
girls, and he at once declared his own  
belief to be that they were a section of  
the remains of Mrs. Conner's little girl,  
who disappeared when seven or eight  
years of age.

Besides the finding of the supposed  
remains the detectives are to-night  
endeavoring to solve the mystery of the  
matter which hardly seems less impor-  
tant. This is the finding of two janitors,  
Joe Owens of Bluffton, Ohio, and Pat-  
rick Quinn of Evanston, who were  
formerly in the employ of Holmes. The  
men were at the Holmes building this  
afternoon. They were taken down into  
the cellar where the bones were found  
the matter, but both stoutly maintained  
their complete ignorance of the whole  
affair.

Quinn acted like a man who was  
badly scared, but Owens, who was  
employed at the Holmes building in  
1893, the year the Williams girls are  
supposed to have been murdered.  
Owens was the janitor of the building,  
which Quinn was a sort of jack-of-all-  
trades, turning his hand to any kind  
of work which came up for him to do.  
He also instructed me to make for  
him a key to the door of the building.

The Trunk Again.

In regard to the mysterious box,  
which by many was supposed to have  
been used by Holmes as a receptacle  
for the bodies of the Williams girls,  
Owens said: "I helped Holmes and  
Pitezel to carry the trunk from the  
depot in August, 1893, about the middle  
of the month. In November, 1893, I  
was in conversation with Mr. about the in-  
tention, Holmes told me he wanted to  
keep the Williams girl in hiding so that  
he did not want her to be seen by any  
of the insurance people, and that he  
could telegraph and get \$10,000 any time  
he wanted. About the last of November or the first  
of December, 1893, I assisted Holmes  
to establish the firm of Campbell, Yates  
& Co., the purpose of which was to  
conduct business on the building at the south-  
west corner of 63rd and Wallace-  
streets, which insurance he received  
to me and instructed me to represent  
him. He also instructed me to make for  
him a key to the door of the building.  
The statement then that I had met  
Minnie Williams, which I did. He in-  
duced me to make these statements  
by promising me my back wages, and  
by his hypnotic ways. While I was  
with him I was always under his con-  
trol."

"I never knew the Conner woman,  
I had heard of her, but never met either  
her or the Williams girl. I never saw  
any woman around the place, Pitezel

was the man who hired me, and I met  
Holmes one day in the basement."

Thought to Be the Body of Gertrude  
Conner.

The bones found this morning are  
believed by the Central Station de-  
tectives to be those of Gertrude Conner,  
the daughter of Mrs. Julia L. Conner,  
who is now believed to have been one

trol."

"I never knew the Conner woman,  
I had heard of her, but never met either  
her or the Williams girl. I never saw  
any woman around the place, Pitezel

yer, Mr. Shoemaker, said this evening  
that he had no doubt that the bones  
found were those of a child, and then  
Mr. Shoemaker related the following  
tale, which he says was told to him by  
his glib-tongued client some time ago:  
According to Mr. Shoemaker, the bones  
belong to the body of a child that  
Holmes intended to use in an insurance  
swindling scheme, but which was never  
used. Holmes and a Michigan  
doctor, whose name Mr. Shoemaker says  
he does not remember, but which was  
something like "Redburn," concocted  
the scheme. The plan was to swindle  
an insurance company, name unknown,  
out of \$240,000. This scheme was much  
more elaborate and theatrical than the  
Pitezel swindle, and its attention to de-  
tails was worthy of even the genius of  
Holmes. Holmes and the doctor were to  
procure some individual who was will-  
ing to take out a \$500,000 insurance for  
consideration. This policy holder was  
to have a devoted and loving wife and  
daughter. When the time came for the  
policy to be paid, the doctor was to  
pretend by supposing dying, the devoted  
wife and daughter were to be so af-  
fected by his death that they were to  
commit suicide.

Test the Body From a Medical College.

Holmes undertook the job of supplying  
the bodies for the doctor's family. He  
was to get the bodies from a medical  
college. The scheme progressed  
until the doctor's wife and child  
and then for some reason the swindle  
fell through. The doctor of the child  
seemed to have been very much of a  
elephant on Holmes' hands. For some time  
he carried it about with him in a trunk,  
but the impudence of being  
constantly confronted with the decom-  
posing remains when you open your trunk  
is apparent, and the scheme quickly grew  
weary of it and was abandoned.

Holmes failed to account for it. At any  
rate Holmes reclaimed his property and  
the doctor's wife and child were  
buried in the house of the child's  
father, and it is the house of this child  
that Holmes got into the cellar to  
own the property at 63rd-street, and  
Mr. Shoemaker says that negotiations  
for its sale are now in progress.

Geyer at Indianapolis.

Indianapolis, Ind., July 24.—Detective  
Geyer arrived here from Detroit to-day  
to investigate this end of the Holmes-  
Pitezel affair. It is believed by the lo-  
cal officers that the missing lad How-  
ard was murdered here and that his  
body taken out of the Cicero Park  
Hotel, where Holmes was stopping, in a  
trunk. What disposition was made  
of the body is the mystery that Detective  
Geyer has come here to solve.

The Valleyfield Murderer.

Montreal, July 24.—Some time since  
Dr. Hugh Macdonald, the physician, be-  
longing from the Rockwood Asylum, King-  
ston, was appointed as expert to ex-  
amine the body of the boy who was  
killed in the Valleyfield murder. Dr. An-  
glin declares that the assassin is cer-  
tainly not the boy who was killed in the  
Valleyfield murder. He is a man who  
is shared by Dr. Clark, who adds that  
the accused had had moments. Short-  
ly after the murder he had been warned  
that he was born a Catholic, but had  
long since forgotten his faith.

Two Results.

The man in moderate circumstances, who  
insure his life for the benefit of his wife  
and family, has the satisfaction that in  
case of his death his family will be pro-  
tected against want and privation.

Call at the head office of the North Am-  
erican Assurance Co., Limited, 22 to 24  
King-street west, Toronto, or interview  
with Charles D. Geyer, at the latter ad-  
dress to avoid the latter of the results  
named above.

NOON CAUGHT UP IN CANADA.

Novelty in New York This Week Been  
Brought to Toronto.

A new fedora has just been brought  
out in New York, and at once imported  
into Canada by Dime King and  
Yonge-streets. It is a stylish hat, light  
in weight, and in color of two kinds—  
a brown mixture and a blue-grey mix-  
ture. It has broad, trimmings of a  
lighter shade than the felt. This makes  
a very becoming contrast. The new  
hat is really made for tourists. It is  
of rough, unfinished felt, and it will  
stand any kind of weather. It is the  
proper thing for either travel or ser-  
vants. During the short time these  
new hats have been on the New York  
market, they have been very popular,  
and society have adopted them. See  
them in the windows at King and Yonge-  
streets, and notice that the Dime King  
and Yonge-streets. They are only here  
for one price for them—\$2.50. They are \$3  
in New York. They can only be had at  
the Dime King and Yonge-streets. A  
new hat supply of 50 per cent  
reduced straw hats and summer caps  
will be offered till August 24th.

Cook's Turkish Baths, 204 King v.

Preps is on each wrapper. Beware imitations.

WERE CULPABLY NEGLIGENT

TORONTO RAILWAY CO. CENSURED  
FOR THE ACCIDENT.

The Jury Recommend the Laying of a  
Double Track, Exonerate the Conduc-  
tor, and Recommend the Conductor  
and the Railway Company to  
Prevent a Repetition of the Disaster.

We find that James Stewart came to  
his death at the Toronto General Hos-  
pital as a result of injuries received in  
the Scarborough road, by two cars of the  
Toronto Railway Company colliding on Sat-  
urday, July 13. We find that adequate  
instructions were not given to motormen  
and conductors of colliding cars.

We find that the excursion cars were not  
properly manned and that there should have  
been a roadmaster with the motorman on  
the excursion train, and that only one  
track. We are of the opinion that the  
instructions were not given to motormen  
and conductors of colliding cars.

the excursion train, and that only one  
track. We are of the opinion that the  
instructions were not given to motormen  
and conductors of colliding cars.

We find that the excursion cars were not  
properly manned and that there should have  
been a roadmaster with the motorman on  
the excursion train, and that only one  
track. We are of the opinion that the  
instructions were not given to motormen  
and conductors of colliding cars.
