Markets.

Toronto Markets.

"CANADA FARMER" Office, Oct. 15, 1866.

THERE is no new feature of interest to notice in business circles. Barley continues to come in freely, although reduced prices are still paid. The receipts of apples were very large on the street market. They sold at from \$1 to \$1.60 per barrel; the latter price being only paid for choice samples.

There is just now a good demand here for live hogs, fat and of good quality. Messrs. Wm. Davies, of the Toronto pork packing ing house, have commenced operations for the season and are extensive buyers.

Recent English newspapers report anxiety in regard to the crops. The weather has been stormy and wet, and altogether unfavourable for the harvest. The London Times says the prospect is at least matter for apprehension. The Mark Lane Express says the crop it seems likely to be more below the average than was expected, and seems very probable that wheat, which has so long been a neglected article, may again attract the attention of speculators. It is thought that Russia would be the greatest gainer by the short crops in Western Europe. The harvest in that country had been abundant, and heavy orders for grain had already been sent to Europe.
