WEST SHORE RAILROAD.

SYRACUSE, N.Y., April 29, 1896.

The Wells Light Mfg. Co., No. 41 & 43 Washington St., New York City.

Gentlemen:—I had in use two of your lights while re-lining one of our tunnels. On this party in use the lights were in constant use for at least six months, day and night. They furnished sufficient light to keep a gang of at least fifty men employed. We experienced no unpleasant effects from their use by either smell or smoke, we at times having a bright, clear, odorless flame. We made no repairs to any part of these lights during the time they were in use on this work.

I consider your light economical and beneficial in every particular wherever its use is required.

Yours very truly,

D. E. DALE, Roadmaster.

General Summary.

The Marie Rose Academy, Montreal, recently selected and purchased a Pratte piano for the use of their advanced pupils.

The revenue cruiser Fiona has made a seizure of a large stock of merchandise, which was secreted at Fortune Bay, N. F.

The Government has ordered the utmost vigilance in enforcing the revenue laws among the American frozen herring fleet now visiting the south coast of Newfoundland.

Highly commended by judges at World's Expositions, and for purity by chemists, Labatt's London Ale and Stout.

About twenty vessels are now seeking herring cargoes in Fortune and Placentia Bays. In the former bay the fish are fairly plentiful. Seeking of herring, it is noteworthy that, if we except those taken by the American vessels, not 50,000 barrels are cured and exported from Newfoundland.

The creditors of A. F. Rooney, gents' furnishings, Kingston, have refused his offer of 55 cents on the dollar. The liabilities are about \$16,000, and the estate shows surplus of \$750. It is probable that the offer will be increased. The creditors are nearly all Toronto houses.

The Atlas Assurance Company have issued their usual convenient blotter this season and it is as much appreciated by its recipients as ever.

A Cuban export merchant has just booked an order for 25,000 tin plates and an equal number of tin spoons to be shipped as quickly as possible, as they are needed for immediate use in the Spanish Army.

The Department of Agriculture of Manitoba has issued its final crop bulletin; but the estimated yield of grain of all kinds, as given in the August bulletin, has not been realized. The total grain crop was 30,442,552 bushels. The acreage for next year is much in excess of this year.

Mail advices from Greece report an active demand for currants from Russia, and state that the stock left there at the middle of last month did not exceed 60,000 tons, all of which, it was expected, would be needed for consumption in consuming countries before the next crop is ready.

Mail advices from Baltimore state that one of the most remarkable features in the canned goods situation there is the fact that seconds tomatoes cannot be bought any cheaper than standards. The stock of seconds is said to be held by packers who are firm believers in higher prices.

Smyrna advices report a very firm market on Sultana raisins. Of the stock remaining there, it is said that a considerable portion is so bad rain-damaged that it can only be used for distilling purposes. Qualities suitable for this market are reported to be in very limited supply in Smyrna.

The Chicoutimi Pulp Company when in operation will give steady employment to fifty men during the year. The daily production of pulp is calculated to be twenty tons per day, or eight car loads per week, being eight tons more than the product of the Windsor pulp factory, and five tons less than that at Grand'Mere.

The lighter your beverage, if pure, the more suitable to this climate. Try Labatt's London Ale and Stout.

Macdonald Bros., men's furnishings, Ottawa, have offered their unsecured creditors 10 cents on the dollar cash. The liabilities are \$14,000, and the stock is estimated to be worth about the same figure. The firm were recently burned out, making a heavy loss when they were only insured for \$500, which was absorbed by chattel mortgages held by different creditors.

The Mark Lane Express referring to the crop prospects says:—"While the wheat is somewhat late in growth this is no drawback for a favorable growth of the autumn sown wheat, and a rise is reported from all the districts of Central Europe but in France matters are not nearly so satisfactory. The weather in Russia is very unsettled, frost and thaw reigning in rapid succession with bad effect on the autumn sown grain. The Argentine crop is not thought to be very large, but advices conflict. Foreign wheat does not sell well even at a decline, and everybody expects a inert trade until after Christmas, and brisk business during the first fortnight in January."
