Manitoba.

AS HIGH as 74c was paid for wheat at Brandon last week.

MANITOBA has a milling capacity sufficient to turn out 2,500 bbls of flour daily.

THE thaw has destroyed the sleighing throughout the southern portion of the Province.

KELLY & Co's roller mill at Brandon, has been remodelled and fitted up at a cost of about \$12,000.

THE well at Solsgrith is now 350 feet deep, but no water has yet been struck. The drill is now working in hard clay which resembles soap stone.

A LARGE quantity of lumber and other building material has been taken from the Birtle Saw Mills to build up the new towns of Solsgrith and Shoal Lake.

NEEPAWA merchants and farmers are agitating for a roller mill of about 50 to 75 bbls capacity with a wheat elevator, to be erected at that place, the small stone grist mill formerly in operation there being shut down.

THE Birtle Observer says:—The delegates from Russel, who waited on the Government the other day, desire that aid will be withheld from the M. & N. W. R'y Co., if the line is not run so as to accommodate the country north of Birtle as was at first intended. It is not always in the power of a Company to decide the exact location of their road, especially when an obstacle such as the valley of the Assiniboine has to be encountered. If the crossing at Shellmouth is as good as the crossing elsewhere the people of that district are fully entitled to the road and will no doubt get it; but if a much better approach and advance to and from the river can be discovered the chances are that the Railway Co. will avail themselves of the advantage.
