

THE IMPROVED TROMMER'S EXTRACT OF MALT.

This Extract is prepared from the best Canada Barley Malt, by an improved process which prevents injury to its properties by excess of heat. It is less than half as expensive as the foreign extract; it is also more palatable, convenient of administration, and will not ferment.

Attention is invited to the following analysis of this Extract as given by S. H. Douglas, Prof. of Chemistry, UNIVERSITY OF MICHIGAN, Ann Arbor:

"TROMMER EXTRACT OF MALT CO.:—I enclose herewith my analysis of your EXTRACT OF MALT: Malt Sugar (Glucose), 46.1; Dextrine, Hop-bitter, Extractive Matter, 23.6; Albuminous Matter (Diastase), 2.469; Ash—Phosphates, 1.7, 12; Alkalies, .377; Water, 25.7. Total, 99.958.

"In comparing the above analysis with that of the Extract of Malt of the GERMAN PHARMACOPŒIA, as given by Hager, that has been so generally received by the profession, I find it to substantially agree with that article.

"Yours truly,
SILAS H. DOUGLAS,
Prof. of Analytical and Applied Chemistry."

This invaluable preparation is highly recommended by the medical profession as a most effective therapeutic agent for the restoration of delicate and exhausted constitutions. It is very nutritious, being rich in both muscle and fat-producing materials.

By many American physicians, and among others by such foreign authorities (German, French, and English) as Nemeier, Troussseau, and Aitken, the Malt Extract is extolled in the treatment of impaired, difficult and "irritable" digestion, loss of appetite, sick headache, chronic diarrhoea, cough, bronchitis, asthma, consumption, the debility of females, and of the aged, in retarded convalescence from exhausting diseases, and indeed most all depressing maladies, in which it has been found very sustaining and strengthening, and admirably adapted for building up and invigorating the system. It is often well borne by the stomach when every kind of food is rejected, thus actually sustaining life.

The presence of a large proportion of *Diastase* renders it most effective in those forms of disease originating in imperfect digestion of the starchy elements of food.

A single dose of the Improved Trommer's Extract of Malt contains a larger quantity of the active properties of malt than a pint of the best ale or porter; and not having undergone fermentation, is absolutely free from alcohol and carbonic acid.

The dose for adults is from a dessert to a tablespoonful three times daily. It is best taken after meals, pure, or mixed with a glass of milk, or in water, wine, or any kind of spirituous liquor. Each bottle contains ONE AND ONE HALF POUNDS of the Extract. Price \$1.00.

In addition to the Extract of Malt with Hops, the attention of physicians is invited to the following combinations:

Improved

TROMMER'S EXTRACT OF MALT, FERRATED.

Each dose contains four grains of the Pyrophosphate of Iron. Particularly adapted to cases of anæmia. Price, \$1.00.

Improved

TROMMER'S EXTRACT OF MALT, WITH CITRATE OF IRON AND QUINIA.

Appropriate where Iron and Quinine are jointly indicated. Very beneficial in the anæmic state following autumnal fevers in chlorosis, enlarged spleen, carbuncles, boils, &c. It is a pleasant tonic, the bitter taste being very effectually disguised. Each dose contains four grains of the Citrate of Iron and Quinia. Price, \$1.50.

Improved

TROMMER'S EXTRACT OF MALT, with HYPOPHOSPHITES.

Far superior to any of the "Syrups" of Hypophosphites, and invaluable in anæmia, scrofulous, tuberculous, and other cachectic conditions. In the various affections to which scrofulous children are liable, as marasmus, rachitis, caries of the spine, &c., it is very efficacious. This combination is, in certain cases, even more efficient in exhaustion from undue lactation than the Extract of Malt with Hops. Price, \$1.50.

Improved

TROMMER'S EXTRACT OF MALT, with the IODIDES OF IRON and MANGANESE

The experience of the late Sir J. Y. Simpson and others in the use of this combination of salts has been fully confirmed by more recent experience. Particularly recommended in anæmia dependent upon scrofula, phthisis, cancer, the syphilitic cachexy, enlarged spleen, and in chlorosis where Iron alone has failed. Each dose contains one grain each of the Iodides of Iron and Manganese. Price, \$1.50.

Improved

TROMMER'S EXTRACT OF MALT, with ALTERATIVES.

Each dose contains the proper proportions of the Iodide of Calcium and Iron, and of the Chlorides and Bromides of Magnesium, Sodium, and Potassium. This combination of the most potent alteratives with tonics and restoratives has been successfully employed in the different forms of disease dependent upon the "modified scrofulous diathesis," as general perverted glandular action, disease of the bones and cartilages, catarrhal affections of the eye, ear, and nasopharyngeal mucous surfaces, eczematous, and other cutaneous eruptions, in rheumatic arthritis, scrofulous rheumatism, &c. Price, \$1.50.

PREPARED BY

TROMMER'S EXTRACT OF MALT CO., FREMONT, OHIO.
