

PARAGRAPHIC.

The Wheel of Fortune.

Moves incessantly, the most buoyant to-day may be loaded down by adversity to-morrow. One peculiarity of that famous alleviator of human suffering—Putnam's Painless Corn Extractor, is the fact that in spite of hundreds of imitations and substitutes it has retained its place in the very front rank as a remedy for corns. This must ever be the case as every person who has used it testifies that it is prompt, painless and certain—three grand essentials which when combined, as is the case with Putnam's Painless Corn Extractor, insure a sure pop corn cure. Sold Everywhere.

The camphor laurel, a native of China, and the tree from which most of the camphor of commerce is obtained, seems to have been introduced successfully into California, one tree in Sacramento having attained a height of 30 feet. The wood, every part of which smells strongly of camphor, is light and durable, not liable to injury from insects, and much favored by cabinet makers.

If you want knowledge you must toil for it; if you want food you must work for it; if you want pleasure you must earn it,—but if you want nice soft hands you have only to use Estey's Fragrant Philodermis.

There is great trouble in the iron and steel market on account of the alleged practice of English foundrymen of mixing crucible cast steel with Bessemer. The one costs \$50 and the later \$25 a ton, so that a large profit inures to the adulterator. The Board of Trade desire to have it made a criminal offence.

Do you feel languid and dull, and have no appetite, then your system is out of order and requires a good bracing medicine. Take a few bottles of Estey's Iron and Quinine Tonic.

The Drug News notes an important discovery, by which aluminium may be produced in unlimited quantities at \$1.25 per pound, or one twelfth of the price now quoted. The discovery was made by Wm. Frishmuth, of Philadelphia, a pupil of Wohler, the discoverer of the metal itself. Mr. Frishmuth is said to have devoted 28 years to this end.

The Upright Piano is rapidly taking the place of the square piano, formerly almost universally used, being a much less cumbersome and more attractive piece of furniture. A very important improvement in the upright, recently effected by the Mason & Hamlin Company, must give the latter still greater pre-eminence as a practical instrument. They have succeeded in dispensing with wood in securing the strings of this instrument to its iron plate, so producing an instrument with purer, more musical tones, and especially of much greater durability.—*Boston Traveller*.

Sir William Thompson, the inventor of the mirror galvanometer for recording cable messages sent under the sea, also invented later that still more marvellous instrument at present in use, the syphon recorder. This last writes the message without touching the paper as the friction would be too great. The pen is a tube stender as the vein of a lady's arm, and through it a jet of electrified ink is thrown upon the paper in the most delicate spray—and this is the recorded thought.
