There are things that you are allowed to do provincially that you are not allowed to do federally. What the government does is simply incorporate provincially where it is a little bit more loosey goosey.

We pass rules here that contradict things that are happening at the provincial level and it does not make any sense. Each jurisdiction has its own rules which contravene or duplicate federal rules. These bills, to a large extent, it seems to me are pitching to the mythical average province.

It brings us down to the lowest common denominator and not the highest common factor.

Mr. Mills: No national standards.

Mr. Rodriguez: That is right. My colleague and friend from Broadview—Greenwood is absolutely correct.

Financial harmonization is not so much a question of technical complexity but rather one of political will. Does the government have the political will to do it? This government has never shown any national leadership, especially in the area of financial institutions harmonization.

What we end up with is the tail wagging the dog. That is what we have here. In the whole process, I am sorry to say that my Liberal colleagues showed absolutely no leadership in the committee. They showed no leadership whatsoever.

There were occasions when they actually watered it down even further by jumping and saying to the grand wizard: "You are putting too much of that in there. Take it out". We wanted to put two auditors in the cauldron. They said: "No, you only need one. Take one out". We ended up with only one auditor for financial institutions.

Read the papers. Read what is going on. There is a feeding frenzy out there. They are involved in all kinds of real estate things. The trust and loans companies are capital hungry.

Madam Deputy Speaker: I am sorry I must interrupt the hon. member.
