It was interesting to hear Professor Moulton give his reasons for the belief that Paul and many other of the New Testament writers talked and wrote the regular conversational language of the day. It was not at all like classical Greek, the pure language itself. In deciphering these mixed dialects found in the New Testament, he said one could form an estimation of how difficult the task would be, by comparing the trouble a German scholar would have in deciphering the English which is contained in the average American newspaper account of a baseball match. A vigorous young leader, Rev. T. H. Lewis, D.D. Westminster, Md. had the first twenty minute essay. It was the subject of responsibility. And like that other good logician the Apostle Paul, he withstood the brethren to their face. There was a fine audience and the speaker had any amount of Bunker Hill ability to speak.
