For over a week surveyors have been working on King west from Simcoe stree to John. There are falf a dozen or more of them, and they seem to be taking very careful records, and are doing considerable checking. They are railway men. It may be that they are railway men. It may be that they are going over the government house site, on which a few men are working, and the neighboring property, with a view to getting locations for the new union station there.

Rumors are affoat that the terminal recompany has come to life erain and plaintiff in Properties.

Rumers are afloat that the terminal company has come to life again, and is going to do something soon.

It also seems pretty well understood hat the C. P. R., and possibly the Grand Trunk, in conjunction, will buy up everything south of King over to Bathurst street.

The companies seem to be going out of their way to explain the delays on starting the station on the Bay and Front streets sites.

Human hair figures as an important article of export from Naples alone, the value of shipments to the United States amounting to \$387,-Co during 1911.
