Excuse me, but wouldn't you like to get in on the ground floor, with no cellar below it? When mining companies are floated, there is a doubt as to whether or not some fellows. were safely hidden in the cellar when you got the tip which induced you to come in on the ground floor. Here is a proposition of a Company founded on rock, with no room for cellars. It is one a few of us formed, to do in a safe, sure and careful manner, prospecting, developing and marketing on a large scale, backed by plenty of capital, what the small, grubstaking, prospecting local companies have struggled to do for some time, with varying success. Some of them have found prospects, but lack of funds and perhaps mining knowledge has tied them up. We purpose, on liberal terms, following up such prospects with a well-equipped staff of prospectors, mining engineers and miners, and if there is anything in them, to market the same after careful development. This Company has no bonus or watered stock for anyone. The Directors pay for their stock just as you will require to should you come in with us. We look on this as an honest business proposition, free from any semblance of doubtful speculation-one which should appeal to you as satisfactory in every way. Send for our prospectus to the COBALT & NEW ONTARIO PROSPECTORS, DEVELOP-ERS & INVESTORS, LIMITED, MANNING CHAMBERS, TORONTO, which gives an explicit account of our proposition. A limited number of \$1.00 shares are being placed at 50 cents. It will be advisable to secure some as soon as
