COAL STRIKE THREATS IN NOVA SCOTIA

TIE-UP OCCURS AT COLLIERIES IN GLACE BAY

Largest Producer Idle Since Yesterday Afternoon

STeamers Wait Efforts Being Made to Have Miners Haul Own Coal From Face

GLACE BAY, N. S., July 14.—Strikes at the two largest producing collieries of the British Empire Steel Corporation were impending today. Number Two mine, the company's largest producer, has been idle since yesterday afternoon, when the drivers on the afternoon shift refused to work without a local contract. The day shift drivers did not turn out this morning, so the pit was idle again today.

At number one, a colliery ranking second in production to Number Two, about seventy of the drivers appeared this morning, but refused to go down in the mine. All other workmen went below, about 4:30 in morning.

At nine o'clock this morning efforts were being made to work the mine, the miners hauling their own coal from the face.

TWO PROPOSITIONS Negotiations between the company, drivers and members of the United Mine Workers' executive have been going on for over a month. Two propositions were submitted to the drivers at Number Two, both being rejected at meetings of the drivers. The company was said to be willing to give the drivers a contract, but the proposals submitted were not satisfactory.

EVERY POUND NEEDED The tie-up has occurred at a time when every pound of coal is needed to load cargo steamers at Sydney. Number Two mine was tied up two weeks ago and at that time the loaders were given a local contract which was satisfactory to them.

HANG 13 FOR PLOT AGAINST KEMAL Smyrna to Witness Execution of Those Condemned by Turks

SMYRNA, July 14.—Smyrna quay, to which thousands fled to escape the wholesale tragedy of the burning of the city four years ago, will witness another tragic scene today. Fifteen persons were condemned to death yesterday for plotting to kill Mustafa Kemal Pasha, President of Turkey, a month ago, on his arrival at Smyrna and today thirteen of them will be hanged at duly separated points of the waterfront. Two were condemned by default.

The suspension was that thirteen death sentences on the thirteenth day of the month boded ill for the future of new Turkey; nevertheless the verdict of the tribunal was applauded.

Britons Hopeful of Cure For Cancer

LONDON, July 14.—That a definite cure for cancer will be found, although it is not yet actually in sight, is the belief expressed by the Grand Council of the British Empire Cancer Campaign in their third annual report which was discussed optimistically by Hon. Neville Chamberlain in the House of Commons last night. The report says "it would be dangerous to raise false hopes at this stage but while any attempt to recede the time when the problem of cancer will be solved is yet impossible, it is not too much to hope that with the continuation of present efforts, a solution of this, one of the greatest medical problems, is attainable."

President Truman replied: "I deeply appreciate Your Majesty's message of sympathy on the serious catastrophe at Lake Denmark Depot, which has cost the lives of a number of our fellow-countrymen."

21 DEAD NOW. DOVER, N. J., July 14.—Indications today were the number of victims of the explosion that destroyed the naval ammunition depot at Lake Denmark and damaged a dozen New Jersey towns probably never will be known.

Even the lightning bolt that set off the \$75,000,000 holocaust probably never will gain official recognition, as the only men who saw it close at hand were picked up dead near the building that was struck or have vanished.

The death toll stood at 21 early today, and wet ground and rains soaked by a heavy rain during the night made for safety as marines continued searching for additional bodies.

According to the report Dr. Haysamer painted the word "this" with acid on the lad's cheeks because he had been caught stealing apples from the orchard. Swearing In On Thirteenth Termed Omen

OTTAWA, July 14.—Is the thirteenth of the month a lucky or unlucky date on which to form a government? Just 30 years ago yesterday the late Right Hon. Sir Wilfrid Laurier formed his administration. His speech had been sworn in as President of the Privy Council two days previous. His government retained office for 15 years, going out of power in the reciprocity election of 1911. Supporters of the new Edson government point to this as an omen of good luck for the present administration.

WANTON MAN SAYS CANADA MUST WAKE UP

—A strong plea that as a patriotic duty Canadian grain and Canadian products generally should be shipped through the ports of the Maritime Provinces, was made before the convention of the Canadian Credit Men's Association today by E. J. Murphy, Halifax, N. S.

MR. MURPHY referred to the transportation problems that faced different sections of the Dominion and to the enormous expenditures made with a view to solving some of these problems through utilization of the Maritime ports.

"Yes," he added, "notwithstanding the fact that export rates through Canadian Atlantic ports are exactly the same as through American Atlantic ports, what we need is a year's worth of an estimated export of 100,000,000 bushels of grain, not less than 100,000,000 bushels will probably go through American ports, 60,000,000 through the port of Vancouver, 60,000,000 through the port of Montreal and probably less than 12,000,000 through the Maritime ports of Halifax and Saint John, though both of them are well equipped with grain handling facilities."

MR. CROSS SPEAKS In another paper, W. C. Cross, Saint John, N. B., said that four links in the chain by which goods are distributed, have become essential. These were Producer, wholesaler, retailer and consumer. The producer, he said, could not begin to furnish the retail trade with the small quantities required, nor could he collect his accounts for such small sums without correspondingly adding to his selling price an amount much greater than the profits now collected by the retailer.

"A credit man must always be absolutely hungry for information both good and bad; he must never be content with what his files contain, but he should be forever adding something here and there and seeking sources through which to obtain information," declared S. F. Jamieson, Saint
