Brokers Figure In Routing Goods Through U. S. Ports

BY A. M. BELDING

MONTREAL, Sept. 27.—I find that the broker figures, perhaps to a considerable extent, in routing goods by American ports. It is not the habit, apparently, of steamship companies trading out of Canadian ports to pay brokers' commissions. Companies using American ports do so, and therefore it is to the brokers' advantage to have goods routed that way. The more one studies this question the clearer it becomes that many interests are involved, and many difficulties must be overcome. Speaking, generally, if Canada had a very large population and steamship services in all directions, her ports would flourish; because the inclination of the exporters and importers would be to have as much of the money of commerce spent in their own country as possible. One exception may be made. I am told there are branches of large American concerns, especially in Ontario, which have a desire to utilize American ports. Of this I will learn more in Ontario.

MR. WILSON, of the Factory Waste & Metals Co., Ltd., appreciates the situation in the Maritimes. He recalls that once in Yarmouth he was reminded that they could get goods overnight from Boston which he could not deliver from Montreal in four or five days. His company does all its business through Canadian ports whenever possible, but if he bought in Chile or Peru, for example, there was no Canadian service. Mr. Wilson asked why it was not possible to interest capitalists in a steel plant on the shores of the Bay of Fundy. The iron ore could be imported by water, and coal was near at hand. He expressed a keen personal interest in the Maritime situation.

Mr. Frankel, of Frankel Bros., who deal in metals, said they do all their business through Canadian ports, and would prefer to do so, even at some disadvantage. Canadians, he said, should use Canadian ports, and he was sure his house in Toronto would gladly forward my mission in any way.

JOSEPH LOGAN, of Watt & Scott, Ltd., said they had got a lower ocean rate from Mediterranean ports via New York than direct to Montreal. The new Italian line, had met the New York rate, and if an all-year service can be established it will get the business. There is generally trouble, in connection with imports through New York, and he would welcome the opportunity to utilize our ports, altogether.

I had an interesting talk with Messrs. Francis and Dempster of McLean, Kennedy & Co. Their lines, the Head Line, Scandinavian-American and Houston, use only Canadian ports. They said they found some reluctance on the part of importers in using their line from South America, and felt that too much business is done through Boston and New York. As I have noted previously, the plea of importers and exporters is that the Canadian service is not frequent and fast enough. Mr. Francis was much interested in the fact that the Canadian Government makes wharfage charges on its wharves at Saint John, but does not do so at Halifax or Portland, although Saint John dipped deep into the civic chest to provide terminals for national traffic.

French Troops Delayed in Concentration of Troops by Downpour.

Canadian Press. FEZ, Sept. 28.—The French troops operating against the Moors have had a foretaste of the rainy season. Telegraphic communication between Taza and Fez was interrupted. The weather showed improvement today, and the French were enabled to resume the concentration of troops for the approaching operations.

HUNDREDS ARE BELIEVED TO HAVE DROWNED

15,000 Square Miles Inundated as River Overflows

SITUATION BAD

Deluge Is Worst Since 1887, Returning Relief Workers Report

Canadian Press. PEKING, Sept. 28.—Fifteen thousand square miles, containing the homes of 2,000,000 persons, are now flooded, and it is feared that hundreds have been drowned in consequence of the break in the Yellow River dyke on the Shantung-Chihli border. The affected area is being extended hourly, and famine relief workers returning from the scene say the flood is the greatest since that of 1887.

A further break in the main south dyke is allowing the waters of the Yellow River to flow unrestrictedly to the south and a portion may reach the Yangtze River through the Grand Canal. The possibility is seen of a complete and permanent alteration in the river's course.

Relief work is proceeding with Yunchengshien as the base.

Silk Tax May Lower Skirt

LEEDS, Eng., Sept. 28.—Britain's tax on silk stockings may have a tendency to bring about a lengthening of skirts. The Yorkshire manufacturers have been deliberating on proposals to make longer lisle thread tops to silk stockings, and so reduce the quantity per pair. Glimpses of the cotton top would be unsightly, it is believed among members of the trade, and so on that account 'skirts would have to be longer.

Ex-M.P. Denounces Cabinet as Not Having Carried Out Promises

RENFREW, Ont., Sept. 28.—"I appeal specially to protectionist Liberals," said Right Hon. Arthur Meighen, Conservative leader, Saturday night, in his speech to a mass meeting in support of the candidature of Dr. M. J. Maloney, in South Renfrew. The leader of the opposition urged that Canada could not prosper without protection, and he asserted that it was useless to elect to Parliament a protectionist Liberal who would be compelled to vote for a low tariff government in order to gain Progressive support in the House.

"We don't want a tariff so high that you would have to use a periscope to see over it," Mr. Meighen said. He had been accused of favoring such a high tariff, he said, but what he aimed at was a tariff which would promise stability from year to year, encourage the investment of money for the expansion of industry, and keep the attention of Canadians directed to home instead of the United States.

LIBERALS SPEAK. Supporting Dr. Maloney were also two Liberals, E. E. Pedlow, former M. P. for South Renfrew, and Russell Sparks, former chairman of the Ottawa Liberal Association. Both declared their intention of remaining Liberals, but denounced the policy of the Mackenzie King government as displayed in the last parliament. Mr. Sparks endorsed a protectionist policy, and quoted figures to prove his contention that industries on such as the woollen industry in Canada had been "destroyed" by the policy of the present government.
