NORTH SHORE CURLERS

PLAN ANNUAL BONSPIEL

Expect to Have It Worked Out By Next Season

Oshagan, N. B., March 27.—The winding up of the curling season took place on Wednesday evening in the club rooms when trophies were presented to the winners. The Robinson cup was won by Skip C. P. Hickey and his rink and a Moosehead by Skip R. A. Loggie and his rink. These were the only trophies presented as the competition for the Tweedie medals and for the Hutchinson cup could not be finished owing to the season being milder than usual.

A scheme is being placed before the curling clubs of the North Shore to have annual bonspiels for which a suitable trophy would be secured, and the place of meeting be changed each year, so that all the clubs might have the contest in their rings in turn. The matter is expected to be definitely settled before the next curling season.

FEWER LOGS

DOWN RIVER

TO ST. JOHN

The Lumber Season Has Been Good For Some and Not so For Others

The exceptional mildness which has distinguished the winter of 1912-1913 has had a marked effect on the lumbering operations of this province, both for good and for ill. In the northern section of the St. John and on the Miramichi, the Nepequin and the Restigouche, where the average snowfall of about six feet always has provided a handicap to the operators, this year's fall of two and a half feet has provided unexcelled conditions for the loggers. In the southern part of the province, in the district between Fredericton and the Bay of Fundy, where there is seldom more than enough snow, the mild winter and the late arrival and early disappearance of the snow has played havoc with the operations. The lumbermen in this section usually are able to depend on at least six weeks of good sledding weather, but this year they had only three, the snow disappearing almost entirely about a fortnight ago.

Fewer Logs to St. John

The cut in the northern section of the province will be average while that of the southern section will show a falling off. But, while the cut at the head of the St. John river will be well up to the average, the quantity of logs handled in the booms at Fredericton and rated to St. John will be smaller than in many years. The estimate for this year is 65,000,000 feet, while last year it was 100,000,000 and the previous year about 100,000,000. The reason for this is partly due to the fact that while there are fewer mills sawing at St. John than in other years, the mills on the upper reaches which ship their lumber to the United States market by rail are handling more than ever. Another reason for the difference was that last year the booms contained not only the full quantity of logs but a large quantity of logs which had been hung up during the previous spring.

As logging operations are still being continued in some parts of the province it is impossible, as yet, to estimate the total cut for New Brunswick, but the prospects are that it will be about the average. Regarding the prospects for stream driving it is still too early to make any predictions. The early warm spell which has caused the disappearance of most of the snow may be detrimental if followed by colder weather. The lumbermen still have to depend on the spring rains for frosted conditions in the shallower streams and cold weather would shut off the supply of water from this source.

MAN OMAHA

R. K. Cameron Anxiously Awaiting Telegram From Kenneth—Sad Scene in Stricken City

R. K. Cameron of this city has been anxiously awaiting news from Omaha which was recently swept by a tornado. His son Kenneth Cameron lives in that city. Mr. Cameron sent a telegram of enquiry but has not yet received a reply.

The latest word from Omaha is that the bodies recovered from the wreckage of Sunday's storm were cared for at undertaking establishments and the greater number of the funerals were held from those places. In many instances churches were demolished in the districts covered by the storm and others were so badly wrecked as to prevent them being used. Nearly 100 funerals were held.

During the night the work of rescue continued. The authorities are taking steps to uncover all the wreckage at once in order to remove any bodies that may be covered.

The real estate exchange has taken steps to prevent the raising of rents. Already cases of alleged attempts at extortion have been reported.

Plans for the immediate rebuilding of the district have been worked out by a big committee of business men. Co-operation is being made to handle the matter in a systematic manner and assist those who lost their homes and personal effects. This association will begin at once the task of at least partially reconstructing many homes.

The daughters are—Mrs. Elizabeth Kelly, of this city, and Mrs. Michael Nugent, of New York. Thirty-seven grandchildren and twenty great-grandchildren also survive. Mrs. McHale resided in Albert county at the time the cholera broke out there, and assisted greatly in caring for the stricken ones. The funeral will take place on Saturday morning and burial will be at St. Martin's.
