Election issue

SRC presidential candidates

GERARD FINNAN
Arts 4

I am very interested in the future of the student union and I am certain that with good organization and direction, the student union can be a viable means of providing good services for the students which the union represents.

I was this year's Orientation chairman which I feel gave me the greatest insight into the operation of the student union. I was arts representative on the SRC and this gave me an idea of the problems of the student union.

I am also involved in many SRC committees including the Constitution Committee and the Ad Hoc Committee looking into Winter Carnival.

I am on the SUB board of directors and the Financial Planning Committee of the SUB. This experience has given me an appreciation of the problems the building faces and the needs of the building for the future.

Most of all my experiences with student activities have shown me where to go, how to get there and who to see.

If I am elected I will dedicate a lot of my time to clean up and improve the image of the student union. I will try to get as many people as possible working for the betterment of students. I feel the student union IS NOT A JOKE and I will make every attempt to see that the union functions for the students and that the students get their money's worth.

I also plan to strengthen and develop Campus Services Ltd. to its greatest potential. I will take very strong and decisive stands on any issue affecting students. These include cutbacks and student aid. I will also work very hard ensuring that students don't get a raw deal from governments and the university!

RICHARD RILEY

I am running for this position because I have a very suspicious feeling that the students of UNB do not have a fair shake in the affairs of the student union. If I am elected, I will see to it that students are given the right to speak on their own behalf and as well, give input into student administration.

I was previously employed by Harrison House in an administrative capacity. At that time (1972-73) we established the first bar system on the campus.

I plan to do a variety of things:

1. bring back football
2. enact certain rules in the affairs of the student union
3. employ campus security in a full-time nature.
4. employ students in a number of campus activities, such as dining halls, sports and security.

Candidates for all positions were asked the following questions:

1. Why are you running for this position?
2. What previous experience have you had that you feel will be relevant?
3. What would you plan to do in your position, if elected?

STEVEN J. KITCHING
Computer Science 4

As a computer science major, I have nothing to gain career wise from the SRC president position. Since I have no career aims in the position as president, I believe that I will be able to better serve the students of UNB.

I am so tired of all the money disappearing from the student body, who are having problems coping with tuition increases. You may have noticed that I haven't spent any of the SRC money on designing and printing tacky "Vote for me" posters and buttons.

I was the first person on campus to solve Rubik's Cube. In other words I have never been involved in any SRC or Orientation Committee fiascos.

I will cut out the frivolous expenditures that have been the mainstay of previous councils. As a member of the CAUSE executive, I am totally against three quarters of a million dollars to be spent on destroying and setting up walls in the SUB. I am also against the proposed increase in SRC fees. I am going to ask for the resignations of the SUB board executive and the members of the SRC executive (for forgiving the loan of past president Perry Thorbourne).

The issue of this campaign is the students' money.
