WHEN the farmer has other work such as running a cream separator, washing machine, and any other light work on the farm, or where his well is close to a building so that an engine may be belted to a line shaft or attached direct to the pump, then a small engine is very convenient. These engines more fully described and illustrated in our catalogue. Either style engine furnished with combined pump-jack or with independent jack. Either single-gearred or double-gearred jack may be supplied.

This illustration represents one of the most reliable pumping windmills sold in Western Canada and is the only one manufactured West of the Great Lakes—always ensuring prompt delivery of repairs. Wind power is cheaper than gasoline power for pumping purposes, especially for pastures or where a large supply of water is required daily. Buy a Manitoba Windmill with regulator and your watering problem is solved. The regulator will let the mill in gear as the supply of water is taken from the tank and will close it off when the tank is full. The wind in Western Canada is constant enough to make a windmill absolutely reliable. More than 110,000 of these outfits are in use to-day in Canada, United States and Australia.

THE ONLY WINDMILL WHICH PULLS INTO THE WIND AND THIS MAKES IT AS NEAR
ABSOLUTE STORM RESISTING AS A WINDMILL CAN BE BUILT. SEE PAGES
40-46 OF OUR GENERAL CATALOGUE FOR FURTHER INFORMATION

Alberta Provincial Schools of Agriculture

At Claresholm, Olds and Vermilion

RECRUITS WANTED!

Recruits are wanted to enter upon the course of training in practical and scientific agriculture provided free at these schools of agriculture. Farmers' sons and daughters can best perform their services for the Empire if properly equipped to fulfil efficiently their duties of cultivating the soil, raising livestock or making the farm home run smoothly.

1916-17 session begins October 31st, 1916. Complete agricultural courses in both first and second year. These comprise every branch of agricultural knowledge, practical and technical, and training in the solution of every useful problem presented to the farmer; in addition, courses in Domestic Science and Household Economy will be given for the girls. These are supplied entirely free of charge.
