## OxyAcetylene Welding and Cutting

### THIS \$3,000 CASTING SAVED from the SCRAP PILE

Illustration shows a 5-ton Bolt Header Frame, recently repaired by the Prest-O-Lite Process at the Brantford plant of the Steel Company of Canada.

This casting, which is valued at \$3,000, had two cracks, one 15 in. long by 6 in. thick, and the other 12 in. long by 6 in. thick.

The saving on this one repair was sufficient to pay for the entire welding outfit many times over.

## Prest-O-Lite PROCESS

employs both gases (acetylene and oxygen) in portable cylinders. Prest-O-Lite Dissolved Acetylene is backed by Prest-O-Lite Service, which insures prompt exchange of full cylinders for empty ones. Provides dry, purified gas, insuring better welds, quicker work and lower operating cost.

Apparatus consists of an equal pressure blow pipe, automatic regulators and gauges, and all necessary equipment. Adaptable for oxy-acetylene cutting by the addition of special cutting blow pipe.

Thorough instructions are furnished free to every user of Prest-O-Lite Dissolved Acetylene. Any average workman who understands metals can learn the welding process quickly and easily.

We will gladly send illustrated literature and interesting data showing actual instances of savings made by others. It may suggest valuable ideas to you. Write for it.
