Certificate of Improvements.

it practically reduces the basis of treat- did much to cause the recent fall in the B.C. ment to the usual scale of costs incident to free milling ores.

What this means to a camp like Rossinvestors.

land, which has hundreds of thousands of tons of low-grade silicious ores in sight, is perhaps not at first apparent, knows that it amounts to a complete this journal, both of which are fortuthough every experienced mining man revolution. Had some fairy dropped into camp and with one touch of her, wand transformed all our low-grade ore

into a \$20 smelting product, the dullest understanding would realize that an enormous, an incalculable sum had been added to the wealth of Canada, and yet this good fairy's work would, in all probability, have added less to the camp's prosperity and given less assurance to its future than has this simple discovery

that the Le Roi's silicious ore is a free milling and concentrating instead of a smelting proposition.

This discovery means that within a year Rossland will contain numerous mills which will be turning out each month hundreds of thousands of dol-lars in yellow bullion, and in addition thousands of tons of high grade concen-trates for treatment in nearby smelters. It means that the tonnage capable of being worked at a profit will be so lower It means that the tonnage capable of being worked at a profit will be so large that more railroads will be needed to handle it, many new mills and smelters needed to treat it and thousands of miners and other laborers will be given emplopment. It means that much of the dead work bitherto done and in many cases consid-

hitherto done and in many cases consid-ered valueless by reason of the fact that it has developed no shipping ore will at once be rendered productive and that [No work has been done on the Northern dozens of companies whose stocks are Belle since about Christmas time. The work now selling at five or ten cents will consists af a crosscut tunnel 114 feet long which shortly be at par or a premium.

a greater city than Butte or Johannes- and stringers of mixed ore for the balance of the burg-the greatest mining camp on earth-and that, too, almost immedi- in about 20 feet at a point where two ledges

ton to smelt and is consequently not treated, can be put through a mill with a loss of \$3.50 per ton or less, leaving \$6.50 or more to pay for mining and re-duction. As at least \$3 from each ton of such ore would be saved on the plates of such ore would be saved on the plates price of the stock, which, up to that

time, was a strong favorite with local

A PAPER published in Nelson has dis graced that city by publishing a half column of lying abuse of Rossland and nately well enough established to survive a good deal of misrepresentation.

> Some time ago THE MINER was advised by a gentleman who claimed to have read Van B. DeLashmutt's manuscript that Rossland was in for a "horrible roast." We have received a copy of the Oregonian containing the article in question, and find it to be a very fair and accurate description of the camp.

LETTERS TO THE EDITOR. A MARTINE . The Northern Belle.

TORONTO, Ont., March 5.

which at this point is about 20 feet wide. There

It means also that Rossland is to be are nearly two feet of solid ore on the foot wall 20 feet. The value of this ore is not known to us. On this same ledge is a second crosscut tunnel intersect. There is also a good showing there.

Dated this and day of March, 1897. 3-4-4t
