VERNON MINERAL CLAIMS.

Nice Looking Gold Quarts Con-ing to the Surface.

CAMP McKINNEY, B. C., Oct. 9. Cameron Bros. are prospecting the Vernon mineral claim in this camp and are getting some nice looking gold quartz ore out of a prospect shaft now down about 40 feet. The Vernon is believed to be on the same lead as that which at 150 feet depth in the Waterloo gave much richer ore than the general run obtained in the neighborhood. There is only one claim between the Vernon and the Waterloo.

The water has been taken out of the

Waterloo shaft and things at this mine are in readiness for resuming work underground. The arrival from Spo-kane of the secretary of the company who expects shortly to put on about 20 men to further develop the mine.
