The Why of Those Shoe Prices

The Central Leather Co., of the United States, annual report for 1919 shows a surplus, after all dividends, charges and interest are deducted, of \$8,384,470, or nearly \$2,000,000 more than in 1918.

The net income last year was \$14,288,481, or the equivalent of \$31.11 a share on the common stock after providing for all preferred disbursements.

The head of a household who has been compelled to buy shoes for the family during 1919 was aware that something of the kind was happening. The official report of the company now makes it clear just what.

The most consoling thing about going to the movies is seeing so many women in the pictures opening their mouths and not saying a word you can hear.

Laying Fowls Require Meat Scrap in Ration.

One of the most significant fact in feeding fowls for egg production—as brought out by experiment at the Ohio Experiment Station, is that rations containing approximately 12 per cent. meat scrap decrease the cost of feed under present market prices more than 20 per cent. and increase the egg production more than 50 per cent., as compared with a ration containing only 2 per cent. of meat scrap. This comparison has held true with both the light and heavier breeds of poultry.

A ration in which the grain mixture was made up of three parts of corn and one part wheat and dry mash mixture of two parts of weight ground corn, one part bran and two parts meat scrap, has given satisfactory results. The fowls consumed twice as much grain as mash.

Thankful Mothers

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N. S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every other mother to keep a box of the Tablets in the house." The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion break up colds and simple fevers and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Covering Iron With Iron

During the war many worn parts of aircraft machinery and motor vehicles used by the British forces were rapidly repaired in a remarkable way. The metal worn away was replaced by depositing a film of iron by means of electricity. This process was applied in the case of ball bearings and other parts where even a minute amount of wear was so serious that scrapping would be necessary. It was also used with good results in saving from the scrap heap any parts of machinery which had accidentally been made a few thousandths of an inch too small. The problem of electrically depositing iron is a very difficult one, but the methods applied by British engineers were most successful. By means of heat treatment the deposited film becomes so closely welded to the metal that microscopic examination can detect no dividing line. Much of the research work in this matter was carried on at Sheffield University.

Three Hundred Thousand Cars in Canada.

Of the 7,884,000 automobiles in the world 6,500,000 are in the United States, according to a survey by the Alexander Hamilton Institute, New York. Therefore, there are almost five times as many automobiles in the United States as all other countries combined. The 1,384,000 automobiles not in the United States when the survey was made were distributed as follows: Great Britain 415,000; Canada, 300,000; France 200,000; Germany, 75,000; Italy, 35,000; Argentina, 35,000; The Netherlands, 20,000; Russia, 15,000; Japan, 3,000; all other countries, 321,000.

20,000 Cheap Suits Coming to Canada

The Canadian clothes buying public will benefit from the recent release of large quantities of woolen cloth by the British Government. Twenty thousand ready-made men's suits are to be shipped to Canada from London at a wholesale export price of about 54 shillings per suit, which at present exchange rates is less than \$12. The suits comprise government tweeds, serges and worsteds, and are not of the type known as "standard suits."

Canadians, it is estimated, spend twenty million dollars every winter in American resorts. This is partly a penalty we owe to our climate, but in many cases the money would be more profitably spent at home.
