FRIGHTFUL STOMACH J. K. FLEMMING TROUBLE

For Four Long Years He Suffered-Then "Fruit-a-tives" Brought Relief.

Relief.

Stratford Centre, Wolfe Co., Que.

May 11kh, 1908.

I have been completely cured of a Trightful condition of my stomach through this wonderful medicine, "Fruit-a-tives." I suffered for four long years with this trouble. My head ached incessantly. I could not eat anything but what I suffered awful pains from indigesti. I used every known remedy and was treated by physicians, but the dyspepsia and head-aches persisted in spite of the treat-sment.

I was told to try "Fruit-a-tives," and it sent for six boxes, and this was the only medicine that did me any good. I am now entirely well, I can eat ordinary food and I never have a head-seche, and for this relief I thank this wonderful remedy "Fruit-a-tives," My wase is well known in this vicinity and you may publish this statement.

FRENCH NAVY

IS USELESS.

Do You Use a Says the Report of the Parliamentary Commission.

PARIS. June 22-The report of the parliamentary commission which investigated the naval scandals in France has been turned in. It is a scathing condemnation of the naval administration for the past ten years and it makes an astounding exposure of the deplorable condition of the fleet for which France has spent \$700,- CATARRH THAT CONTAIN MERCURY

000,000 since 1899. The 350 pages of the report are filled with details of the inefficiency resulting from confusion and red tape, conditions that make French naval con struction cost twenty five per cent. more than English or German. As an vidence of these methods it is pointed out that cast iron shells of large callbre, condemned after the accident to the battleship Iena, continued to be manufactured in larger quantities than free. ever for two whole years. The Patrie, the Republique and other ships of this class were found equipped with seconlary guns of a model of 1885 instead of 1902 as the specifications required. Neither the ammunition nor the guns for the six ships of the Danton type to be completed in 1911, will be ready before 1914 and France has not a single dry dock dapable of accommodating these vessels when they are fin

Perhaps the gravest feature of the exposure is the lack of reserve coal and ammunition supplies at the various ports and arsenals. One officer testified before the commission that at the end of a naval battle of six hours the ships would find it impossible to replenish and would be virtually out
