Values!
The Stock Markets now are literally flooded with seasoned gilt-edge securities that are priced to net the investor 10 to 15 per cent. on outright purchases or up to 30 per cent. when trading on margin.
The cycle of low values, however, is passing and we are entering on an era of better prices. Don't make the mistake of thinking that really-good stocks can forever sell at reduced figures, but get into the market now while current values make it well worth while.
We are fully equipped to execute all orders on margin.
