## Get Out!

How foolish it is for the Tupper press to raise an outcry for a Liberal Government programme at this stage. While Sir Charles Tupper hangs on to office, Mr. Laurier cannot form his Government. He cannot make arrangements to meet Parliament. Let it be understood that the sooner Sir Charles Tupper accepts the verdict of the people, so clearly expressed, the sooner will the new era be inaugurated. It is not the fault of the Liberal chief and his colleagues that the government of the country has been brought almost to a standstill. Every one knows that dissolution was held back till the last hour possible, and that the election campaign was unnecessarily prolonged. Now we have Tupper and his associates, discredited and defeated, determined to continue giving out contracts, filling offices, and performing other work that of right should be undertaken by the men who are the choice of the people. The seemingly thing for high tax journals to do would be to first call upon their leader to cease this usurpation, and permit the Premier-elect to take hold. Not till he is able to do so, have they the slightest warrant for berating the Liberal chief for inaction.

The reaction has set in. Algoma answers the hysterical appeals of the high tax organs to turn against a Liberal Government because it has a majority of supporters in Quebec by turning a Conservative majority into a Liberal majority of over 1,500. And there are others to come.

## New Industries.

Another two new enterprises are announced. In Ingersoll, a company has been formed to take over the old and for years unused Russell foundry. They will prepare lumber for bicycle rims for manufacturers in Canada and Boston, Mass. The material used will be rock elm, and it is expected that a profitable business will be built up. Another industry is that contemplated by Mr. L. Mennig, St. Marys, who proposes establishing a new industry for evaporating by steam fruits and vegetables of every description. He will also make potato flour, pickles (vinegar and sweet), and vinegar itself. Mr. Mennig has not yet chosen his location. Why should not the London City Council induce him to locate in this city? He would be in touch with the wholesale trade and have unrivalled shipping facilities.

It was an ideal first of July. But farmers would not have lamented if it had been marred by a good shower of rain. In many parts of the country the drought has been severe, and the grasshopper pest has been doing much damage. And all this while Tupper cleaves to office!

## The English Oil Deal.

There has been talk for a considerable time past of the formation of a great English syndicate to take over all the refineries, oil wells and fixings generally throughout Western Ontario. The transaction was one involving many millions of dollars. Things were pretty well fixed up until a few months ago, when a hitch occurred, and the transaction is now said to be off. Whether the project will be renewed remains to be seen. Meantime, pending the resurrection of the big scheme, it is reported that several minor operators are proposing to cross the briny and exploit the British investors on their own account.

Liverpool has a city ordinance forbidding the use of the streets to vehicles displaying advertisements. A man who undertook to show an advertisement on a bicycle was recently fined under this law. The Liverpool authorities are live and wide awake. They know that the newspapers are the proper agencies through which to communicate information to an intelligent people.

## West Lambton's Choice.

The official count in Lambton gives Mr. James Lister a majority of 1,158 over Mr. Hanna, his Conservative opponent. This is the largest majority ever polled for any candidate in a Dominion election in this constituency. Mr. Lister well deserves reelection. He has proved an able and painstaking representative in Parliament, and a power in bringing to condemnation the wrong-doers in public life. In the performance of his Parliamentary duties Mr. Lister has earned the esteem not only of his constituents, but of the people generally. He is a "coming man," and any promotion which in due course may be his will give satisfaction to his hosts of admirers in the West.

With what interest will the London public school promotion lists, printed in the "Advertiser," be scanned by both old and young! Early in life does the rivalry of the race begin.

## At Port Stanley.

While Springbank did a big holiday business on Dominion Day, it was not done at the expense of London's lake port. The L. E. and D. R. carried more people to Port Stanley yesterday than were carried on any previous Dominion Day. The L. E. and D. R. authorities are looking well after business and after the comfort of passengers. There is a rumor of an intention to adopt G. T. R. Manager Hays' fast train tactics, and run through at least one train per day in very sharp time. The train service is good at present, but if the management decide to go "still one better," they may depend upon it the public will not be slow in manifesting appreciation.

Port Stanley itself is just now looking its best. Trees and lawns are revealing in verdancy. The lake's expanse spreads out in eternal blue, and there is seldom an hour in the day that cannot furnish a refreshing breeze. Better bathing facilities cannot be found. The cottages are occupied, and all the hostellers have their quota of visitors. The Fraser House never looked more charming, and it is said that this year the hotel is particularly well managed. London has now four parks: (1) Victoria Park, in the heart of the city; (2) Queen's Park, in the East End; (3) Springbank to the west; and (4) the picnic grounds at Port Stanley, which are the property of the city, though at present under lease with the rest of the L. and P. S. R. property to the L. E. and D. R.

As soon as a new Government is seated at Ottawa, the "Independent" papers which turned Conservative at election day approached will become wonderfully "independent" once more—with a squint towards Liberalism. It is a way they have.

## Deserved Praise.

The Winnipeg Free Press, which has in recent years opposed the Liberal party, has a strong meed of praise for Hon. David Mills. Says our contemporary:

"Whether to the right or the left of the Speaker, the Liberal party in the Commons will not be complete without Mr. David Mills, who has just suffered his first defeat in a long Parliamentary career, to the great regret of moderate men of both parties all over the Dominion. Mr. Mills is one of the ablest and best of his party, and we can hardly conceive that Mr. Laurier will complete his Cabinet without inviting him to become a member of it."

With Algoma as a precedent, the new Liberal Administration may expect success in every bye-election.

## Butter in a Minute.

A new process of butter-making, whereby butter can be produced in a minute, has been invented, and some dairymen of experience, who have given the matter some study, assert that it will revolutionize the industry on this continent. The inventor is Herr Salenius, a Swedish engineer, and it is now in successful operation in Sweden, Finland and England. The butter is made from sterilized milk, the milk being heated to a temperature of 160 degrees, and then suddenly cooled to a temperature of 50 degrees, by means of small cooling frames through which ice water is constantly run. The cream which rises is taken by a skimmer, and raised to the churning chamber of the machine. The cream is then forced into a tube, which is perforated with tiny holes, and emerges with great force onto each fresh layer of cream as it rises, converting it into butter by concussion. The butter is then in the form of granules, and is drawn into a tub, where it is mixed with buttermilk. After a thorough mixing, it is put under pressure in a butter worker and almost all the buttermilk is squeezed out. The butter is then placed on ice, where it is kept for two hours. It is then worked over again and made up. The actual time consumed in making the butter, from the time it is put into the cream-skimming chamber of the machine until it is taken out in

the form of butter, is a fraction over a minute. In addition to the saving of time, it is also claimed that the process is so rapid that there is little or no chance of any germs which may be in the dairy, getting into the butter, as the extreme rapidity with which the machinery inside the chamber moves, forces most of the air out. When the butter is once made up, there is little or no danger of any germs getting into it, and the sterilizing of the milk before it is put into the machine, kills any germs which may be in it.

We have seen no statement as to the cost of this wonderful machine. If it can be put into dairies and creameries at a reasonable rate, and is shown to be the good thing set forth in the prospectus, it will no doubt soon get a trial in this country. If there is one thing that Canadian farmers require more than another today it is ability to produce good marketable butter in all seasons.

## Mr. Blake in Ireland.

Hon. Edward Blake, M. P. for North Longford, had an Irish welcome from the people of Mallow, when he visited Cork county the week before last. He made an eloquent and instructive speech, in the course of which he spoke hopefully of the probable results from the coming convention of delegates of the Irish race, to be held in Dublin next September. Irish affairs, he said, had recently been treated with studied neglect by the Imperial Parliament. The reason was not to be found in the majority at the back of Lord Salisbury so much as from lack of unity among the Irish themselves. The Prime Minister of England, with brutal frankness, said Mr. Blake, recently told his party not to despair of managing the Irish cause. Lord Salisbury said that from the time of Strongbow down the Irish had never been able to long agree among themselves. An explanation of this kind, Mr. Blake argued, proved to the Irish members of Parliament, as well as to their followers in the country, the necessity for forgetting the past and joining heart and hand to secure the best possible results for Ireland for the future. Mr. William O'Brien, who is a great favorite in Cork, lauded our fellow-countryman for his wisdom, loyal friendship and personal and intellectual character, which he did not hesitate to say would reflect a lustre upon any assembly or any cause throughout the world. The great audience cheered these sentiments, and warmly endorsed the remarks of Mr. Blake on the necessity for conciliation and unity if good work is to be done.

## THE SHUT-DOWN SCARE

A man around town last night was saying that there had been a lot of talk about factories closing down since Laurier was elected, but it was not all talk, for he had been assured that the Gurney night shift would be shut down Tuesday night, for the plant to be opened up again on Thursday morning.

## AN EPIGRAPH.

Westminster Gazette.  
A correspondent assures us that he has seen the following on a tombstone:  
IN MEMORY OF M. LAURIER.  
Erected by Her Grieving Children.  
What is Home Without a Mother?

## "PEACE, PERFECT PEACE."

The scorcher scorched with all his might.  
His head o'er the handle bars was bent;  
The brewery wagon hove in sight—  
Go ask the winds where the scorcher went.

Constant improvement marks the monthly numbers of the Canadian Magazine, and the best and the latest issue of Canada's national periodical is that for June. Among the more important articles is a vigorous reply to Sir Charles Tupper's recent article on the colonies and the British navy. The reply is written by A. H. Loring, honorary secretary of the Imperial Federation (Defense) League, of London, Eng., who insists that Canada should have the navy of her own. The Canadian Historical Exhibition of 1897, in the promotion of which Mr. Oliver A. Howland, M. P., is taking a very active interest, is the subject of an article explanatory of its scope and of its probable benefits to the country. There is an entertaining installment of Ian MacLaren's Scotch tale, "Kate Carnegie," and a number of short stories and tales of travel by well-known Canadian writers.

The leading feature of Frank Leslie's Popular Monthly for July, is a description of Gen. Robert E. Lee's part in the battles of Fredericksburg and Chancellorsville, written by Col. John J. Garnett, of the United States Artillery, and forming the sixth paper in the magazine's great "Lee Series." The article is profusely illustrated with portraits and battle scenes. In "A Glimpse of Dungeness," Frederick "Light-Horse Harry" is the subject of an article of a "Colonial Homes of Virginia," by Virginia Cousins Mayo, accompanied by more than a dozen pictures. It is a very attractive number. (New York: Frank Leslie's Publishing House.)

**HAIRENE**  
REMOVES DANDRUFF,  
RELIEVES ITCHING,  
RESTORES GRAY OR FADED  
HAIR  
CLEANS THE SCALP,  
USES BALDNESS.
