London, Tuesday, July 24. The market was simply deluged with raspherries this morning, and still the price remained high. The rigs were few, indeed, from which there were no offerings of the ripe fruit, clean bu, 32c to 34c; peas, per bu, 80c to 90c; picked, large and tempting. Such abundance, however, cannot last very der corn, per bu, 60c to 65c; seed corn, abundance, however, cannot last very long, and it was undoubtedly a knowledge of this fact that kept the price fluctuating between 7c and 9c. Only the very best quality brought the latter price. Black rasphereis were price. Black raspberries were freely offered, but not so freely accepted, at 6c to 7½c. Black currants were much in evidence, but were rather slow, at \$1 and \$1 10 per basket. The red ones were more popular, especially those of the cherry variety, which found ready sale at 5c and 6c per quart. Peaches were seen on the square today for the first time. Alexandras were offered in baskets of three sizes; for the 4-quart ones, 20e was asked; those of 8 quarts brought 35c; while 12quart baskets were held at 60c. They went a-begging for buyers, as the public seemed rather chary of purchasing peaches so early. A few small pears also were seen for the first time this year, and prices ranged all the from 35c to 75c per basket. The offerings of apples did not meet with as many frowns as their fellow-fruits, and sold freely at 50c and 60c per

A fairly active trade was done in small vegetables. Corn was plentiful; at 15c per dozen it was bought quite Beets, at 25c and 30c per dozen; carrots, at 20c, and cabbages, at 20c. seemed to be in most demand. Potatoes were abundant. The price that ruled was about 60c per bushel.

prices of provisions have not yet pulled away from previous quota-tions. They stand high, much to the delight of country folk, and equally to the chagrin of city consumers. Sup plies were of a diffuse character thi morning. There was not too much crock stuff offered, nor too many pound rolls. If a good medium has thus beer reached, a good quality is still in the background. However, it is improv-ing, and dealers are hopeful, while consumers are ardently desiring lessened prices with better butter.

The trade in poultry, hides and wool having reached a mid-week level o mediocrity, is apparently content abide there. Such, at least, was the impression conveyed by today.

#### Correspondence Between Delimiting the Alaskan-Canadian President McKinley

And the Emperor of China-The Latter Asks the Good Offices of the Former in the Interests of Peace.

Washington, July 24.-The following correspondence between the President of the United States and Emperor of China was made public by the state department today: Translation of a cablegram received by Minister Wu on July 19, 1900:

"Have received a telegram from Governor Yuan (of Shan Tung), dated 23rd day of this month (July 19), who having received from the Privy Council (at Pekin) a dispatch embodying an imperial letter to the President of the United States, has instructed me to transmit to your excellency. The imperial message is respectfully trans-mitted as follows:

States: "Greeting,-China has long maintained friendly relations with the United States, and is deeply conscious that the object of the United States is international commerce. Neither country entertains the least suspicion or distrust toward the other. Recent outbreaks of mutual antipathy between the people and the Christian missions caused the foreign powers to view with suspicion the position of the Imperial Government as favorable to the people and prejudicial to the missions, with the result that the Taku forts were attacked and captured. Consequently there has been clashing of forces with calamitous consequences. The situation has become more and more serious and critical.

"We have just received a telegraphic memorial from our envoy, Wu Ting Fang, and it is highly gratifying to us to learn that the United States Government, having in view the friendly relations between the two countries has taken a deep interest in the present situation. Now, China, driven by the irresistible course of events, has unfortunately incurred well-nigh universal indigentians. well-nigh universal indignation. #### HID IN THE COAL

Women Had Thrilling Experiences at Tien Tain During Fighting.

Wichita, Kan., July 24 .- In a letter to his mother, Dr. Pruen, a mission-ary in China, writing June 22, from Shanghai, says: "Mrs. Mills (an Englishwoman) arrived here yesterday from Tien Tsin. She tells us that, after the 2,000 Russians had repulsed an attack on the settlement by Chinese soldiers and Boxers, the consul ordered all women and children to leave Tien Tsin. The Mill; family did so. The steamer in which they came down the river reached Taku just in time for the bombardment of the forts, so the women had to crouch beneath great stacks of coal to avoid the shells. Presently from a few of the gunboats they saw the British and Japanese land marines, who rushed forward and seized one of the forts, then the others fell into the hands of Russians and Germans."

#### Take Care of the Kitchen Sink

The sink generates most of the unpleasant odors that come from the kit-chen according to its degree of cleanliness. Of all sinks, a plain one of Iron is the most satisfactory. An enameted sink is desirable so long as it remains unchipped or unstained. Either of the above is preferable to the galvanized sink, which more readily collects greass and is harder to clean. Remember that each time greasy water is poured into the sink a percentage of the grease will adhere to the sides and bottom instead

of running off in the water.

The sink should be thoroughly cleana will. Go over every part, being careful not to neglect the under edges or the woodwork, for if allowed to become greasy, or dirty water soaked, wood will emit odor as readily as a dirty sink.

If an enameled sink has through inusage become so stained that it cannot
