The First Train Stops at the New C. P. R. Station,

And Is Met by a Big Crowd of Spec tators-A Description of the Handsome Structure.

The first train to stop at the new C.P.R. station was No. 5, due here at 11:25 this morning. Hundreds of people, including many members of the fair sex, were on the platforms, while heads could be seen peering through windows in the vicinity. On each side of the track were several rigs, and altogether the scene reminded one of the summer excursion days. Everything was in readiness and there was no hitch of any kind, Passengers on the train either got out or saw what they could from the cars. The train was in charge of Conductor Cardiff, Driver Bouskell, Baggageman Harris and Brakeman Baker. There was no ceremony of any kind and strangers would not have known that anything unusual was happening.

The station is a credit to the company

THE NEW STATION.

The station is a credit to the company and the city. It is built of Credit Valley stone, with cut-stone trimmings, and pressed brick, and covers a ground area of 40x104 feet, with extensions of four feet each, northand south. At each end is a promenade walk 60 feet in length, roofed and slated. The roof is eleven feet high at the caves, and provides good shelter for passengers and baggage. The station is two stories high, with a basement for the irrnace, fuel, etc. The roof is of the mansard style, and slated.

On the ground floor are the agents' and ticket offices, news stand, ladies' and general waiting rooms, separate toilet rooms and a ladies' toilet room, and the baggage and express rooms. All these compartments are finished in British Columbia cedar, the ceilings in panneled work, and the general waiting room floor of English Minton tiles. The wood furnishings were supplied by the London Furniture Company, and the whole is a splendid apartment, and one of the largest rooms in the building. The entire station will be incredited with gas and electric light and heated by hot water, and the latest and most approved designs in drainage and plumbing have been adopted.
