Can not bo put of the officient running

| States. Confederation has in reality given the <br> deathblow to annexation, and the sooner Amer. cans perceive the fact the sooner will ing these colonies to be absorbed into the American union. But this agitation for the by the Ruselan acquisition,' inculcates the speedy performance of a duty by Canadians. Clearly ti wull become the Pariment possible the admission of British Columbia into the Confederaton. Temporary obstacles, as the defficulty of communcation, owing to the vast distance, must be overlooked. The expense of must be looked steadlly in the face. Oar Parliamentary representatives must rise to the dignity of statesmen and conceive brave manfully all that is necessary for the <br> When a paper representing the interests of the Contederacy in an important city of Canada tells its readers that " the entire stretch of British territory trom the Atlantic to the Pa cific must form one chain of united Colonies;" that "Confederation has given the deathblow to Annexation;" that the "duty of the Canadians is to facilitate as rapidly as possible the admission of British Columbiainto the Confederacy;" that "temporary ob- stacles, owing to the vast distance, mast be overlooked;" and that "the expense of a railway to the Pacific, soon to be undertaken, must be looked steadily in the face;" we say unhesi4 tatingly that the moment has almost arived when great and beneficial change will take place in our political affairs, and when, emerging from the cloud ot political misery that has so prospects, we shall soon be standing in the sunshine ot liberty and constitutional Government. Let us use all legitimate means us always bear in mind-in the langaage of the late public meeting-that when we go into the Confederacy it must be on falk and equitable the Canadians to believe they will only offer. <br> The "Lociout" Ended-The V ancouver Coal Mining Company bave come to an understanding with their bands, and work will arrangement has been come to. Mr Nicol, the Manager, notifies in anotber column an 2240 pounds ; and $\$ 250$ for dross or slack. <br> The Aliesandra, which arrived from Metlakatlah on Friday, will be replaced on the survey by the Beaver in which new boilers take the place of the Enterprise on the West, minster ronte while the latter is taking in her new boilerg. |

 we have reason to beliere the propososal
to include this Colony in the Contel eracy will be laid at a very early day withstanding tho predictions of a f fow
in our midst who maintain that in our midst who maintain that th
Confederacy will not take over bankrup Colony like ours, assum
our debt, and guarantee onr except we congent to become civil list parcel of the Contederacy on term
that will be humiliating and destructive to us. We entertain no such
fears, knowing as we well do that to deprive would be to destroy th hopes of Mossrs Macdonald, Cartier
Tiilley, Tupper and other prominen the Confederic Would be irreparable-the corner-ston
of the great edifice would be removed and 1 foundation. This Colony stands in tederacy sas position towards the ConScolia and New Brunswick They guard the eastern entrance to the rio inland treasures of the Confederacy
British Columbia stands at the western portals to look after the interests of onerhalf of the Do
minion. Without a front on the Pacifie the Confederation soheme would never perial Government to cede or sell thie Colong to thic Americane, the whole
conoern wold not require much time concern would not require much time
to follow. It is quitite erue that we are
burdened with debt-the result ot the errors of a Government that could not soing by sixees and severys for for a long while back. But, bad as our Govern mont is, and blighting as the effect of table mistakes have proved, our illimimoved nor destroyed. Their development has only been retarded by the
sinful extravagance and the wretohed nbecility of our rulers; but no evil great that it may not be overcome by
pradence, wisdom, and forethought on - part of wise and careful rule filled with sufficient natural prode upport of a population it itself by the sapport of a population of many mil
lions, and when the resources
$\qquad$
tederaey are so great, our debt will be
regarded by the Canadians as mere minster
her new b
