The attention of the Post has lately been requently called to a remarkable cure in the case of a young girl living within a few niles of this town, whose life was despaired of, but who was completely cured in a short space of time by the most wonderful of all remedies, Dr. Williams' Pink Pills. Since reading in almost every issue of the Post of the cures effected by the use of this med-icine, we felt it to be a duty we owed to investigate this case which has so urgently been brought to our notice, and we are sure the interview will be read with interest by the thousands of young girls all over Canada, as well as by the parents of such interesting patients. The young lady in question is not anxious for noteriety, but is willing to make her case known in order that others who are similarly afflicted may have an opportunity of being equally be fitted. The symptoms in her disease dif-

fered in no way from those affecting thouin every motion, despondent, despairing of life with no expectation or hope of regaining health, and with only one wish left, that of complete rest, physical and mental, we think it one of the saddest of sights. In the quiet little hamlet of Strangfield, in Essex county, just such a case was presented to the sorrowing eyes of loving friends a few months ago in the person of in all. The suits so far known here are:

SPECIFIC CHARGES REQUIRED.

When His Worship the Mayor yesterday When His Worship the Mayor yesterday morning opened the formal inquiry into the official conduct of the city engineer, a novel difficulty presented itself—there was no charge against Mr. Wilmot and no one had come forward to prefer one. It would hardly do for the council to act as prosecutor and trial judge as well, and yet both the board and the engineer were ready and anxious to proceed. Mr. Wilmot was attended by Mr. A. L. Belyea, his legal adviser, while in addition to His Worship the Mayor five members of the council were present—Ald. Williams, Marchant, Glover, Partridge and Macmillan. The preliminary proceedings were in the main informal, various efforts being offered as to the pro-cedure but only one taking definite shape in the form of a resolution

This was introduced by Ald. Williams, with Ald. Partridge as seconder, and proposed that the whole question as to the city engineer's responsibility for delay in the construction to, the city engineer's responsi-bility for delay in the construction of the temporary bridge at Point Ellice, be referred to an "independent committee of three professional men—a lawyer, an en-gineer and a bridge builder"—for_investigation and report to the council. This was opposed by Ald. Glover on the score of cost, and also because such an inquiry would not be final; and was finally defeated on a division of 3 to 2. The Mayor maintaining that the inquiry

would be materially simplified by the presence of specific charges, an adjournment was finally decided upon until Tuesday evening next, by which date Ald. Marchant will have formulated charges of incommentations and delere. inefficiency and delay.

Famous Scholar Dead.

CAMBRIDGE, Nov. 27.—Benjamin Apthrop Gould, the famous scholar and writer, is dead. He prepared to go out last night, and as he was descending the stairs accidentally fell and struck on his head. He died in a few hours.

TORONTO, Nov. 26.—The chief feature of Thanksgiving Day here was the sham fight in which a large number of troops took part. There was a march past be-fore Hon. Mr. Borden, the minister of militia, who was afterwards entertained
