**The Difficulties of the Thrifty**

Mother B—has brought up a large family on a small income and has, of necessity, been of a very frugal turn of mind. The children are married now, and Father and Mother B—are alone and in comfortable circumstances.

One day their son John called, and his mother showed him three big loaves of bread she had just baked. She complained that she had too much bread on hand, and would have to give him a loaf, and also one to her son Frank, since she and father could not possibly eat it all.

John asked, "Why do you bake so much, then?" And his mother indignantly answered, "Do you suppose I am going to heat that big oven for just one loaf of bread?"

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

**WHY CLOTHES WEAR OUT.**

Little Balls of Fluff Found Around the House Give the Answer.

The microscope has answered that long puzzling question of why clothes wear out. By the aid of this instrument that uncovers mysteries of the world hidden to the unaided human eye, it is revealed that when cloth is handled some fibers are rubbed off, which in time become visible and objectionable. The formation of this fluff is not unlike the growth of snowballs that boys roll. Under the microscope, especially with reflected light, these balls of fluff are wonderfully beautiful, gleaming with a brilliancy that cannot be captured by a photograph.

"We speak, and speak correctly, of 'wearing a suit of clothes' when we have in mind only the use of the clothes," a scientific writer explains, "but the garments are literally worn away. We might also speak of 'wearing' bedclothes, because the fibers of the bed linen are worn away in much the same manner as a carpenter wears away the surface of wood when he sandspapers it."

"Drafts and other air currents waft these fibers to and fro until they collect in small clusters of fluff. The 'bits and cantles' that have begun to attract others to them gather more and more until a large proportion of the aerial flotsam has been transformed into what the housekeeper calls 'little rolls of dust' that she finds under the bed and in the corners. These are fibers that friction has removed from the bed linen and from one's clothing."

**SAVED HIS OWN FACE.**

Why He Balked at Being a Witness on the Side of Truth.

Colonel E. M. House—"Silent" House, as he is often called—told at a dinner in Washington a significant parable: "They who expect the men in authority to do a great deal for them—they who expect the impossible—should remember the grizzly bear story.

"A famous grizzly bear hunter gave a dinner, and one of the guests told of a bear hunt that he had once shared in with his host. It had been a remarkable hunt. The bear had been killed under almost incredible difficulties. Although his auditors looked skeptical, the narrator did not spare them any of those difficulties. He counted on the host, you see, for corroboration.

"Then, when he had finished his strange but perfectly true tale, he said: 'There, that's the story, and, gentlemen, our host will corroborate every word I say!'

"'No, George,' he said, 'I don't remember anything of the sort at all!'

"'Tableau!'

"'Maddened by this tableau, the guest at the end of the dinner took his host aside and hissed:

"'Why didn't you back me up in that bear story? You know every word of it was true.'

"'Yes,' said the famous hunter—'yes, it was all true, but I saw that everybody round the table thought you were lying. If, then, I had supported you the only result would have been that they would have set me down for a liar too.'—Washington Star.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

Posset. The proper meaning of the word "posset," frequently used in Lancashire, England, is a drink taken before going to bed. Originally it was milk curdled with wine and comes from the Latin *posca*, meaning a drink made with vinegar and water.

Highly Necessary. "Why is the official spelling of government with a big G?" "Because they could hardly begin government without a capital."—Baltimore American.

Mean! "Fa, what is spending money?" "Any coin your mother gets hold of, my boy."—Detroit Free Press.

Now They Don't Speak. Boss—If I were in your shoes— Jess—Don't talk of impossibilities.—Boston Transcript.

Any time is the proper time for saying what is just.—Greek Proverb.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure no better remedy than Miller's Worm Powders, which are guaranteed to totally expel worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can exist where these Powders are used.
