Containing in four parts clear and concise descriptions of the diseases of the respective animals, with the exact doses of medicine for each.

A book on *diseases of domestic animals*, which should present a description of each disease and name, the proper medicines for treatment in such condensed form as to be *within the means of everybody*, has long been recognized as a desideratum. This work covers the ground completely. The book embodies the *best practice* of the ablest Veterinarians in this country and Europe, and the information is arranged so as to be *easily accessible*—an important consideration. *Each disease* is first described, then follows the *symptoms* by which it may be recognized, and lastly is given the *proper remedies*. The different medicines employed in all diseases are described and the doses required are given. The book is copiously *illustrated*, including engravings showing the shapes of horses' teeth at different ages. An elaborate index is a valuable feature.

It is printed in clear, good type on fine paper, and is handsomely bound in cloth, with ink side stamp and gold back, and is a book which every person ought to possess, who has anything to do with the care of animals.

It will be sent to any address—postpaid—on receipt of the price, **One Dollar**, or on the remarkably liberal terms stated above.
