Order Your POTASH At Once

Order your POTASH at once. The Potassic and Phosphatic fertilizers should be applied to the soil as soon as the land is workable so that the crop can get the full benefit of these materials in the first season.

Many disappointments with fertilizers are due to the fact that they have been applied too late for the crop to get full benefit from them, although ensuing crops always benefit. Remember these fertilizers are not used up in the first season but are effective for several seasons.

Nitrate of Soda should generally be applied as a top dressing at planting time. Slower acting Nitrogenous fertilizers can be applied earlier with the other materials.

MURIATE OF POTASH and SULPHATE OF POTASH

can be obtained from the leading fertilizer dealers and seedsmen.

WRITE for our FREE, educative bulletins, which include,—

"Artificial Fertilizers; Their Nature and Use."

"Fertilizing Grains and Grasses."

"Fertilizing Orchard and Garden."

"The Potato Crop in Canada."

"Fertilizing Hoed Crops."

"Farmer's Companion," etc.,
