

4 Star Lime Juice

Druggists and Wholesale Dealers would do well to stock
up on 4 Star Lime Juice.

THE STANDARD OF EXCELLENCE

We have not advanced our price on this article.

The Bole Drug Co

of the dome will be 136 feet above the grade of the Court of the Fountains, and the Temple and its pavilions will form a very attractive part of the landscape scheme of the entire group of the Exposition buildings.

The auditorium, which will seat 1,200 persons, will be a few steps up from the grade of the building, and in addition the restaurants and balconies will give further seating accommodation for 1,600 people. The other pavilions in addition to the one used for the main entrance will be occupied by stage and for a fully equipped restaurant with the necessary kitchen adjuncts, serving rooms, etc. The auditorium is only a few steps below the floor grade of the restaurant, and the partition between the restaurant and the auditorium will be glazed so that people seated at the tables can overlook the audience and enjoy the concert or entertainment at the same time. The flat domed roof of the auditorium will be supported by eight massive piers. Between the piers will be large arches opening into the galleries, to the main entrance, and leading to the stage. Over each of the eight large arches will be a cartouch bearing an inscription indicating one of the grand divisions of music—Oratorio, Grand Opera, Symphonic music, Lyric music, etc. The lighting will be through the star-shaped windows previously mentioned, passing through eight ceiling lights, each having 320 square feet of glass. The front of the galleries will be decorated with a frieze of singing cherubs. An elaborate and complete system of heating and ventilating will be adopted for this building. Numerous and commodious entrances and exits will be provided, so that absolute safety to visitors will be assured. The

interior as well as the exterior of the temple of music will be treated with a view to securing the best architectural effects.

In the temple of music will be erected one of the largest and finest organs in the United States. It will be an exceedingly beautiful and complete instrument, with all the latest improvements in organ building. It will have four manuals and about fifty speaking stops and will be voiced on three different wind pressures. The action will be the most complete style of tubular pneumatic. The mechanical contrivances and combinations will be most complete and include many varieties not hitherto used. Of the four manuals the great organ will have fourteen stops, two 16-foot stops, six 8-foot stops, three 4-foot stops, one 2-foot stop, a twelfth and a four-rank mixture.

The swell organ will have fourteen stops, one 16-foot stop, nine 8-foot stops, three 4-foot stops and a three-rank mixture.

The choir organ will have eleven stops, one 16-foot stop, seven 8-foot stops, two 4-foot stops and one 2-foot stop.

The solo organ will have three 8-foot stops and one 4-foot stop.

The pedal organ will have ten stops, one 32-foot stop, five 16-foot stops, one 10-foot stop and three 8-foot stops.

There will be a number of couplers, pedal movements and adjustable combinations of the most modern type. The case will be of Gothic design, to harmonize with the architecture and decorations with St. Louis church, Buffalo, for which the organ is intended after it has served its purpose at the exposition. An interesting fact

in connection with this instrument is that it will be built in the city of Buffalo. The contract has been awarded to Emmons Howard & Son, the well-known organ building firm, now of Westfield, Mass., but who have arranged to begin work in their new factory at Buffalo and hence the organ which will be seen at the exposition will be the first large organ manufactured in the city of Buffalo.

Minnesota State Fair.

Minnesota will be "at home" to all the people of her sister states and of Western Canada during the week commencing Sept. 3, and ending Sept. 8, 1900. During this week the great Minnesota State Fair is scheduled to occur at Hamline, midway between St. Paul and Minneapolis. This fair has made a phenomenal growth during recent years and now is beyond doubt entitled to first place in the United States. There are 200 acres in the grounds and over 400,000 square feet of floor space in its buildings. Its exhibits are comprehensive in all lines of production, making it a veritable exposition. It has the best grand stand in the northwest; has two perfect race tracks, and its day and night amusement programmes are wonderfully interesting. Because the next American Hereford cattle exhibit, an event of national character, will be held at this approaching fair, the railways have extended their half-fair rates to much of the territory of the neighboring states, giving many more than the usual number of people the opportunity for seeing this great event. Visitors will be richly entertained.

The Ontario oat and wheat crops are reported to be the best in many years.
