

SYDENHAM HOUSE, OTTAWA (Photo View).

Dr. Edward Playter's Sanatorium for the treatment of the above named diseases and any intractable cases which cannot be successfully treated at home.

Situation: Delightful, elevated, sandy soil, extensive river and country outlook; all advantages of both city and country.

Hydrotherapy (warm, medicated shower and other baths) a specialty: with massage, electricity, and any special medication; as may be indicated.

Cases of Marked tubercular phthisis taken to Gatineau Mountains, a few miles from the city.

Midway between the Atlantic and Great Lakes, the atmosphere here is dry, sunny, aseptic and most invigorating,—sparkling with “highly vitalized oxygen”; practically germless, in winter especially from the constant sheet of snow over the ground; and free from the moister air of the alternate thaws of Western Ontario and the more cloudy Muskoka. Studiously selected, on *meteorological data*, as of the best on the continent for curable cases of consumption; consumption being comparatively rare.

ADDRESS: EDWARD PLAYTER, M.D., OTTAWA, ONT.

OF DR. PLAYTER'S RECENT BOOK ON CONSUMPTION

The British Medical Journal records:—“The parts . . . dealing with prevention and treatment are full of thoughtful suggestions.”

New York Med. Jour.:—“This is a remarkably interesting book, in which the whole subject is treated in a clear and able manner. . . . Sufficiently complete and scientific to satisfy the needs of the physician.”

Journal of the American Medical Association:—“We opened this book with the intention of glancing through it hastily, and ended in reading it carefully. . . . It should appeal, not only to physicians, but to intelligent victims of the disease.”

The Maryland Medical Journal:—“The subject is treated in a very thorough and scientific manner. The author has read the literature of the subject with great care. . . . The book is an excellent one.”

Archives of Pediatrics, New York:—“It is thoroughly up-to-date as to the infectiousness of consumption, its *de novo* origin, possible open-air growth of the bacillus, etc., and thus commends itself to the profession.”

Dominion Medical Monthly:—“Chapters 8, 9 and 10 are alone well worth the price of the book.”

Dr. Daniel Clark, Professor of Medical Psychology, University of Toronto, writes:—“Dr. Playter's work on consumption is a valuable contribution to Medical literature. . . . The work shows the author well acquainted with all the modern theories and practice known in respect to this deadly disease.”

Sir James Grant, Ottawa, writes:—“Dr. Playter has . . . devoted great attention to the investigation of all phases of this disease, and his able efforts in various scientific journals have contributed much toward the diffusion of valuable knowledge as to preventive means and treatment. His recent work will amply repay careful study by even the scientific expert.

In one volume, 343 pages, strongly bound in cloth, price, \$1.50. Toronto: William Briggs. New York: E. B. Treat.
