

"Borolyptol"

Its Bacteriology

The crucial test of the efficacy of an antiseptic fluid is the bacteriological one. When we state that BOROLYPTOL is equal in germicidal potency to a 1-1000 solution of Corrosive Sublimate without the irritant or toxic properties of the latter drug, we base our claim upon the results of careful laboratory experimentation with the different varieties of germ life. We have full, complete and conclusive reports from the bacteriologists of the N. Y. Post-Graduate Medical School, City Hospital at Boston, and the Garfield Memorial Hospital at Washington.

These will be sent upon request.

BOROLYPTOL is palatable, fragrant, and slightly astringent. It does not stain linen or clothes. It should be employed in Gynecology and Obstetrics, Rhino-Laryngology, Surgery and Dentistry. Also internally in the treatment of Typhoid Fever, and in the gastro-intestinal disorders of children.

Send for "Expert Evidence."
