

The post graduate course is open to graduates of medical schools in good standing.

Intending candidates must first register with the Registrar of the Medical Faculty.

The fee for the course, including registration, is \$50.00, payable in advance at the office of the Bursar of the University.

Receipts for fees paid must in all cases be shown to the Superintendent on the occasion of the first demonstration in either hospital.

Applications will be received and further information furnished by J. W. Scane, M.D., Registrar Medical Faculty, McGill University.

MEDICAL PREPARATIONS, ETC.

SOME THERAPEUTIC USES OF SANMETTO.

To facilitate easy childbirth some physicians prescribe sanmetto, beginning about six weeks before confinement, with good results in every case.

If sanmetto is used in conjunction with instrumental treatment of urethral stricture it will be found to soothe, check or prevent the smarting and inflammation that is so common after passage of bougie.

In allaying inflammation in the prostatic urethra, before surgical operations, and in keeping the urine bland and non-irritating after the operation is complete, sanmetto has been used very extensively and found valuable.

SYMPTOMATIC OR COMPLICATING ANEMIA

Is that form or condition of blood poverty which results from various constitutional infections and diatheses. Prominent among such causes are, syphilis, rheumatism, paludal poisoning, tuberculosis, carcinoma, etc. In many instances, such an anemia is due to some obscure, latent metabolic perversion, or a slow but persistent intestinal auto-intoxication of gastro-intestinal origin. While it is an axiomatic principle that successful therapy depends upon the removal of the causative factor, it is more than often wise and eminently judicious to adopt direct hematinic treatment while the underlying cause is being sought for and combated. Pepto-Mangan (Gude) being bland, non-irritant and readily tolerable, can almost always be given, with distinct advantage to appetite, digestion, nutrition and general well-being, while causative therapy is under way.
