Cast Steel Bells are much lighter than those made of ordinary bell-metal of the same size, and are consequently more easily rung; and owing to the den-sity and also to to the well-known strength of the material, it is almost impossible to break them with ordinary usage.

These bells have been successfully introduced in some of the largest cities and towns in the United States and Canada, for Fire Alarms, Churches, Factories, &c.,; and being sold much cheaper than Composition Bells, this fact in connection with their lightness, strength and sweetness of tone, cannot fail to commend them to public favor.
