

ANNEX I

DECLARATION ON TRANSFER OF TECHNOLOGY

“The Member States and the Community are prepared to confirm to the Canadian Government that they recognize the legitimacy of transferring sensitive technology within the meaning of the London Guidelines on the conditions laid down therein. They note that Canada also intends to make transfers of CANDU technology (heavy water moderated pressure tube reactor technology and fuel element fabrication technology, D₂O technology) and other technology specific to its fuel cycle to any Member State subject to certain conditions.

They consider that it is or will be for the Member States wishing to import such technology to conclude agreements with Canada comprising the commitments required by the Canadian Government in connection with these transfers.

However, these states must be entitled to transfer this technology to another Member State on condition that the second recipient Member State has provided the Canadian Government with the same commitments as those provided by the first Member State.

Accordingly, the Community and the Member States confirm that there is no obstacle to the conclusion of such agreements between Canada and any Member State of the Community wishing to conclude them, provided that these agreements are entirely consistent with the Treaty establishing the European Atomic Energy Community”.
