☾ The column of the moon's southing gives the time of high water at Parrsboro', Cornwallis, Horton, Hantsport, Windsor, Newport, Truro, &c.

THE season for commencing active operations in the field having arrived, it may not be out of place to submit a few remarks on the subject of ploughing, as this is perhaps the most important operation in field culture, and one which should be performed with most care and attention. No amount of extra labour in the after culture can compensate for a defect in the ploughing of the ground; and he is certainly an improvident and unwise farmer who will allow his grounds to be imperfectly broken up in the preparation for a crop. There has evidently been great improvement in this branch of farming in the last ten years, more indeed than in ten or twenty previous ones, but still not one half of the land is well ploughed even in this age of improvement. Deep ploughing is one of the most efficient agents in the improvement of soils, as it is in the continuation of good soils. Never omit it. It may scantily pay you for a year or two; but it will ultimately repay you an hundred fold.
