

volume called *The Tutor's Key*, which affords solutions to the Questions in twenty-four important elementary Works.

As some errors in his authorities and in printing, and some temporary fluctuations in numbers and quantities, may require correction and alteration, the Author earnestly invites communications from Tutors, and others, for the purpose of conferring every possible perfection on successive editions of the work.

The PRESENT Edition has undergone considerable alterations and corrections, and is also very much enlarged, from many valuable sources.

In analogy with his General Geography, to which he provided a volume of popular illustrations, he has provided this Grammar with three elegant volumes on the Natural and Artificial Wonders of Great Britain and Ireland, accompanied with attractive engravings; and he expects that it will enjoy a permanent and extensive popularity.
