LONDON AND THE WATER PROBLEM

Said a Londoner who is a frequent

"It is absurd to say that Chatham's filtered river water is the equal in every respect of London's spring water. I know nothing about the purity of Chatham's water, but it is not marked the progress of the Orange nearly so palatable as our own, and it parade here today and the police gave gives off a disagreeable odor when being boiled. In summer it is lukewarm, cope with the situation. When street and is only tolerable when iced, but to the majority of people ice is a luxlury. It would be a thousand pities if All along the routs there was trouble. London's cool spring water were ex-Cars were stalled by having poles changed for such stuff as Chathamites

> This bears out the testimony of Dr. H. A. McCallum, of this city. In a letter published a few weeks ago, strongly opposing the river filtration plan,

that a well-known resident of that city consulted me today (April 16), fensive in odor at times, particularly when boiling it."

he conditions are more favorable to ver filtration than in London. The Chames at Chatham is an imposing stream, even in the driest part of the

year. Fair-sized steamers give a regular service between that city and Detroit during the summer months. In London, the Thames is a puny, sluggish affair in midsummer, especially above the forks, from which the water would have to be taken for the city's use. The greater volume at Chatham flowing water tends to purif, itself in some degree, would lead us to suppose that the water there would be of better quality.

The discussion of the water problem geration. In a street car the other morning ex-Ald. Wyatt and another prominent citizen were debating the lutely needed it will not, it is understood. plates erecting a very large factory on relative merits of spring and river water, when the conductor, who was passing with his fare-box, remarked this morning that the water supply this earnestly: "No river water for me, year has been standing the test well, and gentlemen. I lived alongside the river it is understood that at no time since the for twenty years, and nearly every day I used to see dead horses, dogs, or cats, fact, there has at all times been a respectfloating by. Do you think I'm going to able quantity in the big basin-sufficient drink that SOUP!"

This is one extreme, and the other is Thames is a series of "bubbling the people from using the hose this year. springs." The truth lies between the two. No doubt springs flow into the north branch of the Thames, but the river is formed for the most part by Wireless Company To Send Them the drainage of a long stretch of country. Necessarily, filth and offal enter the stream along its entire course, but allowance must be made for the self-Yesterday afternoon Mr. John Mc- And the Scarcity Is Hindering the Pas- purifying action of running water.
