CROPS IN BRITISH INDIA.

The Department of Statistics of India telegraphs to the International Institute of Agriculture the following information as regards cultivated areas and the harvests in India.

The area sown with wheat in 1921-22 is estimated at 28,012.0 thousand acres, showing an increase of 20 per cent. as compared with last years' area and a decrease of 1 per cent. when compared with the average of the previous five years.

The yield of rough rice is given as 1,138,164.9 thousand centals, being 19 per cent. above that of the preceding year and 8 per cent. above the five years' average.

The cotton-yield is estimated at 17,920.0 thousand centals, which shows an increase of 24 per cent. as compared with last year and 2 per cent. above the average.

As regards cane sugar this year, the resulting yield is 58,060.8 thousand centals or 8 per cent. over that of last year and 9 per cent. below the five years' average.

Price of Tea Highest in Years

Montreal Gazette:—During 1920 so much more was produced than was required throughout the world that the market dropped to a comparatively low point. So serious was the position of the growers in India, Ceylon and Java that they agreed to produce 20 per cent. less tea during 1921. The result was that less tea was produced than was required, and now all surplus stocks have pretty well been exhausted to fill the deficiency. Prices in the last four months have steadily advanced, until the market today is at a level as high as was ever before reached, even during war years.

CEREALS AND LINSEED.

The International Institute of Agriculture is in receipt of the data relative to the production of wheat, oats and linseed in Argentina during 1921-2, which are given here below and compared with those of last year and the previous five years.

The production of wheat is estimated at 92,925.2 thousant centals against 101,853.9 in 1920-21 and 102,522.7 the average of the preceding five years; showing a decrease of 8.8 per cent and 9.4 per cent. respectively.

The production of oats is estimated at 10,551.4 thousant centals, being equal to 69.3 per cent. of that of 1920-21 and 61.8 per cent. of the previous five years' average.

For linseed, the production in 1921-22 amounts to 17,764.9 thousand centals or 62.9 per cent. of that during 1920-21 and 120.5 per cent. of the five years' average.

Toleration in Quebec.

Le Canada: "The Province of Quebec is tolerant. It proves this every day in relation to the English-speaking and Protestant minority. It proves it in its legislature. And it has proved again in a manner singularly eloquent in electing by acclamation an English-speaking minister, whose own province in the west refused him a seat. If it is right to declaim on the subject of toleration and conciliation, it is superfluous to direct such efforts of rhetoric towards us. Tolerance and conciliation are true Liberal principles. We have practised them for a very long time now."

A CROP COMPARISON.

The Statistical Bureau of the International Institute of Agriculture has just published the February monthly Bulletin, which includes returns of the areas sown with winter crops in Belgium, Bulgaria, Spain, Finland, France, Poland, Roumania, Canada, United States, British India, Tunis and Algeria, indicating an extent practically identical, for the wheat and rye crops, with that sown in the previous season. A decrease in France, Spain and Roumania, is made up by an addition to the wheat area in British India, totals 42.6 million hectares in 1921-22 against 42.4 million last year. For rye the decrease, chiefly in the United States, is counterbalanced by an increase in Poland, totals 9.1 million hectares against 9.0 million in 1920-21.

The prospects of these crops are varied; they are rather poor in Belgium and parts of Poland, good in France, Great Britain, Eastern Poland, India and Japan, satisfactory, in Bulgaria and Egypt, variable in Italy and in the United States.

Live stock data shew a satisfactory increase in the numbers of all classes in Roumania during 1920, while in Germany there is during 1921 an addition of 12 per cent. to that of pigs, but no marked change as to horses, cattle and sheep.

Interesting data as to the number of sheep in Syria and the Lebanon indicate a total in 1921 of about 1.150 thousand head.

The Permanent Executor

A man by becoming an executor does not cease to be a man. He still has his private business, his personal interests, which are bound to take first place in his plans.

He is still liable to run out of town—for a business trip, or a fishing trip—perhaps just when your wife most feels the need of consulting him.

He is still subject to illness, years, loss of business acumen—death.

Your affairs need a permanent executor, such as The Canada Permanent Trust Co.

This company's business is attending to your business. This company is never beyond your reach—it takes no vacations, and so is never unavailable through absence.

This company is not subject to incapacity or death. Its exceptional personnel is continually being recruited with highly trained, responsible men.

The management of your affairs is permanent, continuous, vigilant—when your executor is
