TYPEWRITER

You Want THE BEST? Which is it? Why, THE YOST.

No. 4, New Model for 1895.

It is The Best. Because of its Perfect Work, produced by direct printing from the wonderful centre guide, which causes every type to print exactly in line, as it is mechanically impossible to strike the paper except in the proper place.

Then the YOST PAD (which is guaranteed for six months) does away with the clumsy and expensive Ribbon, with all its train of annoying machinery to watch.

HE TYPE-BAR of the Yost is peculiar and unique. It is at once the lightest, strongest, and quickest type-bar on market, actual mechanical tests prove that a Yost type-bar will run continuously for twenty ye without being worn out.

THE POINTER. It always shows where the next

letter will print.

No calculation or consulting of scales required.

Just move the carriage along until pointer is at
the place where the next letter is desired, and it
will print there.

THE SCALE on the front rail is helpful in tabulated work, and its use is generally well understood.

THE KEYBOARD is the universal arrangement, the same as used on the other machines. Each character has its own key—no shifting for capitals, etc.

See how easily the paper is inserted without lifting any pawl or other device. The paper can be turned backward or forward to the
