FOR INCREASED MAIL SERVICE Public interest should be aroused immediately in the mail situation Tengers have been called for for the transportation of the mails during the next four years, and the contracts will close in May next.

As now contemplated the tenders will be made on the basis that has prevailed during the past year, viz., for the weekly delivery during the wiater of 700 lbs. of first class mail and 1000 lbs. of second class mail-

This service as has been amply demonstrated during the winter is en tirely inacequate to meet the growing necessities of the districts At the rates which the government is now in a position to secure from the mail contractors, there is no good reason why any particular limit should be set to the amount of mail defivered Yukon is now an integral part of the Dominion of Canada and as such should be given the same privileges with respect to mail service that the other portions of the country enjoy.

There is no reason why any limit should be set to the amount of mail brought each week from Whitehorse to Dawson that will not apply with equal force to the service as maintained between Winnipeg and Vancouver or Ottawa and Montreal.

The fact should be called to the attention of the postmaster-general that rates for winter delivery between the coast and Dawson are 75 per cent le s than they were four years ago.

rreight and express has come all winter long at 25 cents and 30 cents per pound from Whitehorse to Daw- mer by the consent of both parties. and there is no reason why delivery of mail if an unlimited service is contracted for, should cost very much in excess of those figures.

The facts bearing upon the case tion Co., settled. should be brought immediately to the attention of the postmaster-general in order that he may be thoroughly informed in regard thereto before the contract is let. Prompt action hauled away and used by defendant. should be taken before it is too late.
