Use Care and Avoid Trouble

MANY growers of Field Roots seldom succeed in having a good crop. Why is it? They may not carefully consider that seed differs in quality and value just the same as any other article they purchase. All varieties of seed are valued in proportion to the care with which they are grown. Good seed is the first requisite for a good crop, and the quality governs the price. Next to the seed is the careful selection and preparation of the ground for the crop. Care in selecting seed together with intelligent cultivation are the absolute requirements to win success—successful growers know it and prove it.
