smith, of Stone Quarry, Welland Co. Messrs. Albert Tambyn, of Orono and Mr. Alexander Smith, of Enfeld, in Durham Co., are both thinking of competing and will probably take part in both the special competition for Durham County and the general competition for the district between Kingsten and Toronto.

THEY WERE SORRY

After the winners in our last com-pitition were anounced, a number of larmers expressed regret that they had not competed because they believed that their farms would have scored bigher than the farms of their neigh-righer than the farms of their neigh-range of the start of the start of the start of the start of the because their fences are not in shape, or their barns poor and for some

because their renews are not in shappy, or their barns poor and for some other similar reason and later they will be sorry when they know, win prizes that they might have won had they extend

Interest Growing in the Dairy **Farms** Competition

10

Letters are beginning to reach Farm and Dairy from farmers in different parts of Ontario who are inter-ested in the big dairy farms com-petition that will be held in the pro-

vince this year, the particulars of which are given in an advertisement appearing elsewher; in this issue. Among the farmers heard from during the past few days have been, Mr. Jas. Begg, of Gravel Hill, Stormont Co.; Mr. John A. Caldwell, of Fallow-field, Carleton Co., and Mr. Geo Sex-

SALT-Absolutely essential.

LINSEED-Used in some form by every stockman and horse owner.

ROOTS AND HERBS-Just enough to keep worms out of the system; pre-vent colic caused by indigestion, and aid in thoroughly assimilating the regular feed. WHAT IT DOES

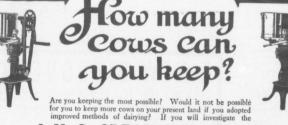

BITTER-LICK is properly proportioned to make stock healthy and keep m so. It is a them so.

Tonic, Febrifuge, Corrective, Blood Purifier, Digestor Worm Destroyer, Prevents Colic, A Wonderful Appetizer

Worm Destroyer, revents Colic, A Wonderful Appendiar All animals like it and taket it with great relish. Always before the animals they will not injure themselves by over-eating. Neither will they contract any unhealty appetite for it as it contains no injurious drugs or chemicals. Its use may be discontinued at any time without ill effect.

Price 30c per cake ; \$3.00 per dozen. Free Sample Brick for 10c. WILLIAM COOPER & NEPHEWS 152 BAY STREET

I. H. C. CREAM HARVESTER

you will almost certainly find that you can increase your dairy herd, making greater profits with even less labor and less expense than you require under present conditions. 1. H. C. Cream Harvesters are enabling hundreds of dairymen to enlarge their operations. They get all the butter fat, skimming closer than you can by hand. They save work, worry, time and trouble.

They give you the warm skim milk, fresh and sweet, as a nourishing for nourishing foo ar calves, pigs and chickens. It re-quires only the of a little oil meal to take the place of the butter for an excellent feed.

I. H. C. Crean Hurvesters are made in two styles: Dairymaid and Bluebell. Either machine will be a great help to you-will enable you to keep the maximum number

Dairymaid This machine is chain driven and is made in four sizes: 350, 450, 650 and 850 pounds capacity per hour. The

chain transmits power from the crank through the gears to the bowl with minimum friction. This makes the Dairymaid exceptionally light-running, also very simple and durmail exceptionally injust-running, and very simple and sur-bale. The crank and the supply can are at the most con-venient height from the floor, and the spouts are high enough to permit the separated product to be discharged into ten-gallon milk cause. The frame is constructed to keep into the second maid is a winner.

Bluebell

The Bluebell is a gear drive machine and made in four sizes 350, 450, 650 and 850 pounds capacity per hour. The gears are accurately cut from the finest material procumble. Al oiling facilities are provided, making the machine long-lived. The frame is constructed so that it is absolutely impossible for milk or dust to gain access to the gears-troubles. Yet the gears per cent of ordinary separator toubles. Yet the gears per cent of ordinary heaparator toubles. Yet the gears per cent of ordinary tent is not approximate the separator toubles. Yet the gears per cent of ordinary tent of the supply can and crank shaft are in the most convenient locations.

Call on the International local agent and examine the machine he handles. If you prefer, write direct to nearest branch house for a beautiful illustrated catalog fully describing these machines. CANADIAN BRANCHES: Brandon, Calgary, Edmonton, Hamilton, London, Montreal, Ottawa, Regina, Saskatoon, St. John, Winnipeg International Harvester Company of America, Chicago, U. S. A.

(Incorporated) ention the name of this publication when writing to advertisers spirit and if more farmers will take hold in that way it will insure the success of the competition.

TELL YOUR FRIENDS

As the time left in which to adver-tise the competiton is short it is possthe competence is and the pos-ible that a considerable number of farmers who do not take Farm and Dairy, but whose farms would be likely to win prizes were they entered Dikely to win prizes were they entered in this competition may not hear of it. If our readers know of any farmers they think would be likely to win a prize, we hope that they will tell their friends about this competition and show them the announcement when the convertible thetererere and snow then the announcement about the competition that appears elsewhere in this issue. It will be a great honor to your section to win one of those prizes and therefore, it is that the there will de use its section.

cne of those prizes and therefore, it is hoped that you will do all in your power to get as many of your friends as possible to compete. Owing to the fact, that the districts into which the Province has been di-ided are so large, many farmers are afraid to enter their farms through fear that farms in other counties are better than theirs. This should not stop them. There is a possibility that so many farmers may has through fear stop them. There is a possibility that so many farmers may be stopped from entering for the same reason, that the number of entries actually receiv-ed will be small. Enter your farm therefore, and taks a chance. The hence will be one that you may well be proud of should you win a prime.

A GENEROUS CONTRIBUTION

A GARAGON OWNERS THON Much to the delight of the commit-tee of management, the De Laval Sep-arator Co., through its Eastern Cana-dian Manager, Mr. W. R. Breyfogle, of Montreal, has sent a letter contrib-uting \$200 towards the expenses of the commention. M. Breyforde let the competition. Mr. Breyfogle's let-ter is as follows:

"We are interested in your an-nouncement of a prize farms' competi-tion to be held during the next three years in the Province of Ontario. This solution for the province of Ontario. This should prove to be a great incentive to dairy farmers and a mighty good thing in a general improvement way for the Province of Ontario. One who has gone from one end of the Prowho has gone from one end of the Pro-vince to the other cannot fail to be impressed with the abundant oppor-tunities for improvement and to be driven to wonder at the neglect ap-parent in so many cases. "We want to maks one suggestion, which out to be followed out by every former who uses farm machingre, of

which out to be followed out by every farmer who uses farm machinery of any kind and that is that the farm machinery should not be neglected any more than live stock. While the liv-of farm machinery is still, at the same time it is none the less real. Our sug-gestion is that a protecting abed for gestion is that a protecting abed for investment, over the very frequest. investment, over the very frequent method of cold storage for farm imp-lements now in use in the winter time; in other words, the unfortunate habit in other words, the unfortunate have, of leaving binders, mowers, plows, harrows, wagons and in fact every-thing of that nature out in a snow bank or just wherever it may be drop-bank or just wherever it may be dropbank or just wherever it may be drop-ped on completing a job. Farm mach-inery represents an investment, or in other words, so much money in what-ever form it may be, and there is just as much common sense in allow-nig a roll of bank bills to lay around there is allowing the machinery as there is in allowing the machinery to be thus treated. We believe a good

t be thus treated. We believe a good strong precaution from you though Farm and Dairy would prove helpful in a good many cases. "We have pleasure in saying that we shall contribute \$200.00 toward the expense of Farm and Dairy's Prize Farms' Competition. The Province of Ontario is ideal in so fare arthe of Ontario is ideal, in so far as the dairy industry is concerned, and dairy farmers, in making their farms mod-els of excellence, will do their part in raising the reputation of Ontario's farm and dairy products to a still higher and safer plane."
