## How to Get Better Yields of Milk

Many a farmer has been perplexed after learning something about rationing to discover that his feeding is not producing results. Many feeds are high in milk-producing protein but fail because the feed is so indigestible that little of it is absorbed into the system. Getting that digestibility factor right is one of the niceties of rationing which has been taken care of in

## Monarch Dairy Feed

Its high digestibility means that a maximum amount of nutrient elements is assimilated. Therefore you get more feed value from Monarch than from other feeds. It means both economy and better yields of milk.

Monarch Dairy Feed is composed of oil cake meal and cottonseed meal, both of which are rich in protein. For bulk there is bran, corn feed and barley feed. The proportions have been calculated with the utmost accuracy for producing better yields of milk. The proper balance of oil cake meal and cottonseed meal prevents constipation that takes place when cottonseed meal is used alone. Monarch is palatable and highly digestible. To keep your cows in best condition the year around, thus getting better yields in the milking season, it certainly will pay you to use Monarch always. Guaranteed analysis: protein 20%, fat 4%.

Get a ton from your dealer. If he does not sell Monarch, write us direct, giving dealer's name.
