

The easiest way to prove a thing is to show it.

For years, we have advised farmers and their wives to let "bucket bowl" cream separators of all sorts alone—because they wash hard, rust easily, are easily damaged and wear out in consequence.

How do you like this solid dish pan full of disks? There is absolutely nothing in that pan but disks—just disks from the bottom up—and all from a "bucket bowl" machine a disgusted farmer and his over-worked wife discarded for a Sharples Dairy Tubular.

They got very tired of washing and drying it twice a day.

What's In The Other Pan?

That little piece in the other pan is the triple tinned, pressed steel, wear forever dividing wall used in the Sharples Dairy Tubular Cream Separator bowl. It is about like a napkin ring in size and shape, is just as easily washed, is instantly removable and is absolutely all there is inside Sharples Dairy Tubular Cream Separator bowls.

You'll never forget this picture. Every time you think of cream separators you'll

The Dish Pans Tell The Story

think of the difference between the Sharples Tubular and the "bucket bowl" kind—a difference in work, wear, efficiency and profits just as great as the difference in the contents of these two pans.

It is not surprising that Tubular sales exceed those of most, if not all, other separators combined. "Bucket bowl" sales are so reduced, by Tubular popularity, that some makers of "bucket bowl" separators resort to peddling in order to dispose of antiquated, cheaply-built machines that reliable dealers will not handle and farmers will certainly regret buying. What good is a peddler's guaranty? He's here today—gone tomorrow—and your money gone with him. What good is such a maker's guaranty? So little that reliable dealers refuse his goods—that's why he resorts to peddling.

The manufacture of Tubulars is one of Canada's leading industries. It is the world's greatest cream separator. It will give you greatest satisfaction—greatest profits—greatest wear. Get catalog No. 193

The Sharples Separator Co.
Toronto, Ont. Winnipeg, Man.

Will you wash one piece or a pan full? If you prefer one piece, then get a Sharples Dairy Tubular Cream Separator instead of a "bucket bowl" machine. Sharples Dairy Tubular bowls contain only one little piece, instantly removable and just like the single piece in the dish pan. All other separators are the "bucket bowl" kind—full of parts and works. The full dish pan contains the many disks used in one of the "bucket bowl" machines that are being discarded by the car load for Sharples Dairy Tubulars.

BUILDING?

Before deciding on your roofing examine into the merits of Paroid. The superior "wear proof" water-proof solution with which our Paroid felt is saturated and coated positively insures a long wearing surface. Paroid cannot dry out, crack or buckle. It will resist wind, water and fire. Will not taint rain water.

PAROID ROOFING

is easy to lay, is attractive. It will wear for years in any climate. Its use on Gov't buildings for years shows the approval of the Gov't's expert engineers. It has been used for years on factories and mills and by farmers and poultrymen everywhere.

OUR GUARANTEE: Buy PAROID ROOFING, apply it to your roof and then if you are not satisfied send us your name and address and we will send you a check for the full amount you have paid for the roofing, including the cost of applying it.

Write for sample of PAROID, also free booklet of plans entitled "Practical Farm Buildings" if about to build.

When Writing Please Mention this Paper!

NO DUST
WHEN YOU SHAKE A "PEASE" FURNACE

ALWAYS INSTAL A PEASE "ECONOMY" FURNACE

That is another strong point about a "Pease." There is absolutely no dirt—none in the cellar when you shake it, because the large dust flue takes it up into the Combustion Chamber. None in the air reservoir—because all horizontal joints are "cup" joints, and the cement lies in the "cup"—so the cement cannot fall away, all perpendicular joints are riveted steel plates.

If you are building, or your present heat is not satisfactory—write us. All we want is a chance to tell you about our furnace—and leave the judgment to you.
