

THE POOR DYSPEPTIC

Suffers Untold Agony After Every Meal.

Nearly everything that enters a weak, dyspeptic stomach acts as an irritant; hence the difficulty of effecting a cure.

Burdock Blood Bitters will relieve all the distressing symptoms of dyspepsia and in a short time effect a cure.

Mrs. F. C. Gross, Berlin, Ont., writes:—"I have been troubled with my stomach for the last seven years and tried all kinds of medicine for it, but none of them ever cured me, for as soon as I would quit using any of them, the same old trouble would come back. Last fall I was advised to try Burdock Blood Bitters, which I did, and used four bottles, and now feel so strong I can do all my house work nicely and can eat almost anything without it affecting me in any way."

"Our boy is also using it; he always complained of pain in his stomach and all over, like rheumatism, and at the age of ten had to stay home from school. He hasn't quite used two bottles yet and is feeling good, can attend school regularly and eats heartily."

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Beggar—My parents died and left me an orphan.
"They did, eh? Well, what are you going to do with it?"

QUESTIONS AND ANSWERS. Miscellaneous.

EIGHTEEN-SHARE BEEF RING.

Would you publish a chart for an eighteen-share beef ring, if there is such a thing?
B. O.

Ans.—Perhaps some reader will oblige.

POOR TELEPHONE SERVICE.

Two years ago, five (neighbors) of us entered into an agreement with the Telephone Company for telephone service with town for a term of three years, at twenty dollars each per year—the farthest subscriber being six miles from town. Since then they have put on nine more subscribers, making fourteen in all; so we have a very poor service; can hardly get line when we want it. Is there any way we can get redress?
Ontario.

Ans.—We cannot answer your question definitely without seeing the agreement, or a copy. But it is probable that it entitles you to a reasonable service; and if you are not being provided with that, you should write the company, complaining, and proposing to withhold further payment until the service is made satisfactory.

SIPHON.

I would like to know whether I can siphon the water from one well to another, distance apart 200 feet. The windmill is on the lower one (31 feet deep). The deep well (39 feet) has the stronger spring. There is a fall of six feet on the surface between the two. The higher well is 39 feet deep and the other 31 feet?
W. S.

Ans.—The siphon cannot be used to deliver water at a point higher than its source. If the point where you wish to deliver the water is below the level in the other well, then a siphon can be used, unless obstacles between are too high. The height to which a siphon will work depends on atmospheric pressure. If the barometer is at standard pressure, that is 30 inches of mercury, or 34 feet of water, since mercury is 13.6 times as heavy as water, then the siphon would work almost to 34 feet, but since the barometer often reaches less than 30 inches, occasionally dipping as low as 28 inches of mercury, the siphon would not work more than 20 X 13.6, or 380.8 inches, that is 31.7 feet. The greater the elevation above the sea the less the height to which the siphon will work.

SEEDING ALFALFA ON FALL WHEAT—FITS IN PIGS—TIME TO SOW BUCKWHEAT—PEA WEEVIL.

1. Have about four acres of heavy clay, high land. This was sod, which I manured last spring and sowed in peas and oats. This fall I disked it and put it in wheat. Would this do to seed to alfalfa in spring? If so, tell me quantity of seed per acre to sow, time of sowing, and whether to harrow wheat after sowing?

2. Have young pig, fed on shorts, oats, and wheat chop; also whole corn. When fed, it will take a few bites, then back up, fall down, and lie there and shake for a few minutes, then it will get up and eat all right. Give cause and treatment.

3. What is the best time to sow buckwheat so as to get good, plump grain, for show purposes?

4. What is good for lice on hogs?
5. Is there any way to treat seed peas to kill the bugs?
U. A. M.

Ans.—1. This is not an ideal preparation for alfalfa, but might answer. Chances are grass will give trouble and necessitate early breaking. Sow twenty pounds per acre of first-class alfalfa seed. It may be sown on frost-honeycombed seed-bed, or later on soil dry enough to harrow. We cannot say which is better, but incline to prefer the latter plan.

2. This is supposed to be due to indigestion, caused by too liberal feeding. Lessen the feed, give it dry, and the drink in a separate trough. Keep gravel, charcoal, or wood ashes, in a low box, so he can take it at pleasure and keep his bed dry.

3. The last week in May, or early in June.

4. Lard and coal oil mixed.
5. Yes, treating the peas right after threshing with carbon bisulphide.
