Lightning Protection

WHAT are you doing in the way of protecting the big outlay of money you have invested in farm buildings and live stock AGAINST LIGHTNING? Without protection you risk your investment in farm buildings and live stock in every lightning storm. You are carrying insurance; sit down and figure what your loss would be if you were burnt out by lightning after collecting your insurance money—also take into account the high cost of building material and stonemasons' and carpenters' wages.

The matter of lightning protection has been taken up by the Government Agricultural College at Guelph, Ontario, also by the Mutual Fire Insurance Companies of Ontario at their annual meeting in Toronto in January, 1914, and they strongly advocate all farmers to protect their buildings against lightning and to see that the rods are properly put on, as the erection of the rod is one of the most essential parts. They advocate copper rods.

We manufacture the highest-grade copper rods and their equipment that can be put on the market, and are the oldest exclusive lightning rod manufacturers in Canada.

All our agents and their erectors are experienced men trained by the company, so that perfect installation of the rodding can be depended upon. Write us, and we will have our local agent make an estimate for you.

We want a few good live men for territory still open in Ontario, Quebec and Maritime Provinces.
